

Agh.. Buoyancy?

Source: <http://sci.tech-archive.net/Archive/sci.physics/2005-07/msg01095.html>

Well, my physics teacher from last year didn't cover Buoyancy very well. I barely remember any of it – and need to know it for the summer packet and next year. I plan on digging out my notes tomorrow, but with how disjointed my current memory of it is, I don't think it will have all I need.

Does anyone know any –good– websites for fluids, pressure, and buoyancy? Ones that, hopefully, will include examples and problems to try? I've tried with Google, but I can't find them (if they even exist).

Thanks! ^.^
