Dear George, tj Frazir and all other friends of humanity, as well as to
all others as official rusemasters like Sam Wormley and T Wake;

I am flattered I get a proper mention in your "posts" now. Thanks.

Few quick ones for you – do you honestly believe what you write? You must
spend hours constructing these posts.....

You do realise MI5 doesn't exist don't you? That is a name made up by the
press. You will have a bit more credibility if you refer to them by their
proper name = "Security Service."

However given the, erm, tone, of your posts I am not sure you mind too much
about accuracy or credibility. For example "MI5" (Security Service) is a
"homeland" agency – if you think "Incest Cloned Borgs" are trying to do
things outside the UK you may mean the Secret Intelligence Service ("MI6" if
you choose to use your incorrect nomenclature).

By the way, what does "Incest Cloned Borgs" actually mean?
