Spit some math out reterds.

You Fuckin wake..

You toss stones then run and hide from the path . Your too retarded and you dont even undrstand your car eninge but think you can coment on the LPE .

YOUR non logic and racist and classist.

You are brainwashed pice of dirt.

Brainwashed by idiots hiding intelects behind fasist racist scocal classes.

WHY the fuck do you even open your traps ?

YOU FUCKING cowards dont do anything dont do the math dont know shit AT th same time you fuck with people that DO evrything.

IF you fuckers ever looked up a frazir foto you might find a nexfor banner and find Im modest and have much more money then I let on. the paper king on planet earth .

Voltz Netz .

get a clue.

When I hit the auto market its all over.

10 million engines will shock the world markets.

The outboard is 29 times better .

The LPE svr is even better because the engine will boil and o2 and gas ballanced to maintain 450 F .

Detnations deep in the sea wile filming expand 1.3702 second then colaps . 1.3 sec expansion at 1000 feet.

THE TIME it forces water out in all directions is the opeminun static stroke time.

1/50th sec after det is nothing ,,the big thermal exchange takes place inthe next 10/50 sec.

No wounder the big boats run at 104 rpm .

1000 rpm is fuel stupid.

YOU FUCKING DUMBUCKS think engineers use the best methods !!

You take it for granted !!!!!!!!!!!!!!!!!!!!!!!

You dumbfucks think the engineers are energy gods but the fact is most of them are fucking stupid.

the uscg was never convinced Im from this planet after seeing my engine room.

IB last fuel stop was 2 years ago.

Re: T.J., Wake is fucking coward pansy get the fuck out

Re: T.J., Wake is fucking coward pansy get the fuck out

no wires and pipe systems .

"" Tats a diesel ĸ ""

Where's the engine and control room ??

The control room is that black box on top of that 20 foot 22 inch post in the center.

The rotor is under the floor and the pipes stick out under the ship.

They don't understand my chips are 3d stacked and a pc takes up the area of a dime.

Yes I can ..I got rid of all the wire.

I stacked all the chip silicons in the biggest pc on top of one another I pod.

take 1000 peneloms and stack them .

each chip don't get a place on a board but connects the next chip by the sandwich method.

10 penelom processors take up a whole card. I just stack 1000

„coat the fucker and its one processor. No need for smaller „just thicker.

I put the pc in a flat screen „its the tower and screen and has no wires.

sure the chip is as big as the screen but its a stack of sheets of chips .

silicon circuits are not very thick easiest connection between 2 chips is by putting them on top of one another so te can connect 3d between chips .

WEB TV came before windows.

This unit is now 1980–2005
