No, the html caches locally, but the applets do not. You've got to have an active connection to load the page. Even mirroring programs can't get the applets.

I did, a letter and a couple of e-mails to folks in the Physics dept. No response. I suspect they just aren't supporting it anymore.

I'm not looking to get it for any other reason than classroom use. Since U of C offers it free, I'm hoping someone can share the download link.

Can you not download all the htmls and supporting files on your computer?
