Is it possible that there are people or things stuck in that flat spot in time somewhere?

No. Hanuman is actually made of the stuff, the ether, that is what he is made of, he would just give you a little bump. (He is made of the stuff, we are waves in the stuff.)

But then you wouldn't say, well lets go people, if we get stuck Hanuman will give us a bump, because he might not. He might just leave you there for all you know really, so you never want to bet on something like that.

.
