1 ..you have a seller ad a buyer you dont need a loan. Just the bank to secure it.  
2 ..you use the trad leads to find them.  
3 „base it on the math „check the buy offer agaisnst the sell offer.  
for exsample ..aluminum is 240 cents per pound market price for scrap cast.  
You can get that 6 million pounds for 50 cents per pound .  
Email the seller and confirm his price .  
Then find a buyer , offer the buyer a bit off the market price for 6 million pounds .  
secure the contract by using the trade bank.  
Read the trade leads „its easier then explaining shit just because you wount fucking know till you look . You wount know whats going on unless you get in te trade leads and look. NOT looking in the tade leads and asking stupid shit and insulting me wount work.  
can you ride a bike ?? How did you ever learn ?  
by trying to ride the bike .  
by having the balls to get on the bike .  
Im your training wheels you wount fall off.

look the scrap market prices up and show me what evrything is worth .  
lets see if you will put any effort up.  
It dont take much effort..but no effort gets you nothing ..

.
