PD wrote:  
BIG SNIP

Therefore it does  
no good to try to extrapolate what we know from the universe \*today\* to  
deduce what must have happened or been in force then. It simply is not  
true that what is trustworthy in our universe can be assumed to be  
trustworthy then.  
PD

What a load of religious crap, PD conveniently  
suspends the Laws of Physics to create a  
universe, where do these crack-pots come from?
