:-) I am looking forward to seeing how Jeff, erm, responds
to this.

I would bet a tenner on "completely ignores" but thats a too easy bet!

Sadly, you may be correct here. There is always the chance that he will
reply with some word salad, in which he will use as many "science-sounding"
words as possible – with no concerns over how appropriate they may be.

And if he would only read Parallel Worlds he'd have a much clearer idea
of the whole problem....

PS have you shoved "Jeff_relf" into google. He's like the Leonardo da
Vinci of cranks. I've been hard pressed to find things he doesn't
profess hidden knowledge to.....

And the things he's admitted.. posting his address, money issues,
posting nude....

Re: Cosmic_Inflation is an artificial model of the Planck_Length transition...

Re: Cosmic_Inflation is an artificial model of the Planck_Length transition...

Urgh. I think you've put me off my tea now...

Tell me bout it. I know the net is supposedly an insightful view into the human condition, but even I have limits..

If my mond boggled anymore it would introduce spatial distortions to the cosmos....

Its OK, Jeff will come up with some more. I mean why not have another dozen or so dimensions..

What next after temperature though? Electrical resistance, colour, pressure....

--

The greatest enemy of science is pseudoscience.

Jaffa cakes. Sweet delicious orangey jaffa goodness, and an abject lesson why parroting information from the web will not teach you cosmology.
