Hi Eric_Gisse, Re: Wikipedia.ORG/wiki/Albert_Einstein#Religious_views

You told me:

You have yet to show one reference that mentions "pseudorandomness". Considering your penchant for spewing meaningless word salad at every opportunity, I doubt you can.

Irregardless of Einstein's exact wording,
Eintein endlessly asserted that dice/nature are/is pseudorandom.
Numerous Wiki admins are ignoring such authorities as:

Plato.Stanford.EDU/entries/time/#8
ACA.MQ.EDU.AU/PaulDavies/publications/reviews/THAT%20MYSTERIOUS%20FLOW.pdf
Wikipedia.ORG/wiki/Block_time

Further, these same admins are enforcing the Wildly_Absurd notion that determinism means probability distributions are hooley !

.
