Greg Neill wrote:

Now, if you want to invoke some other theory of gravitation other than Newton's (or even Einstein's), then all bets are off and you can diddle with G to your heart's content. But you should first make clear that this is what you are proposing to do.

Besides that each formula in the physicist has the physical sense, science of the physicist in engaged in an explanation of physical natural phenomena and ignoring of elementary logic resonings conducts to disotions of scientific thinking.
