Hi PD, Although I understand/love my code/theories,  
I'm not at all surprised that no one else can undersand/use them.

No. Does that mean we agree they are gibberish?

Get it ? If someone paid me, I'd write code/theories for them, not me.

By the way, I was at a cocktail party[1] over the weekend and there were lots of bankers there. Out of curiosity I asked what sort of computer games they played – the most common answer was either Civ IV or things like Ghost Recon. Which one did you write?
