So far the closest to this  
paper that I can access is

[http://www.physi.uni-heidelberg.de/physi/publications/dipl\\_krantz.pdf](http://www.physi.uni-heidelberg.de/physi/publications/dipl_krantz.pdf)

I haven't gotten much feel  
for the jumpy motions.

Yes ... And thank you for the URL. I have  
been relying mainly  
on 'popular' accounts but have wanted to  
delve a bit deeper  
into the details.

That link is not the original experiment as far as I can tell.

Yes... they still seem confused about what they are seeing and  
I am a little disappointed there isn't a bit more classical analysis  
that might link to some coherent matter explanations.
