If you believe otherwise, you are an idiot.

Do you know how USA, European countries became rich countries?

Here is classified info: they recycled waste newspapers and printed notes on it. Govt of poor countries don't have that centrifuge to enrich waste newspapers to currency note quality.

And the tech which enrich uranium is same tech to enrich waste newspapers. That is the reason for tension between N Korea-Iran and USA, EU.

Now CIA will fire me for leaking secret info. Anyway I got job in KGB to support Iran.

.
