You name it, its in here somewhere.
Can be purchased online (Paypal) and downloaded right away.
Please Visit the below Website for full Details
Screen Shots, buying, Specs, etc.<http://vehiclerepair.org/handy/handyman.htm>

All this underlines what I have always been saying about AI. There is tons of stuff out there. Problem is an index. Let us look at something else.

Question – "Do the angles of a triangle always add up to 180 degrees?
A chatterbox was asked this question and said it did not know. I happen to know there is GR stuff out there which will simulate a spinning black hole for you – produce accurate jets etc. So out there there is the answer "no". saying "no" is in fact a matter of retrieval technology.

"?Quieres dormir con fosforo?" Google is on the right track with its AI program, but it cannot get there until it can distinguish between the different types of "match".
