I dont load 3500 trucks to get a load on.

It dont cost me 14 bucks a ton to get my log to my mill.  
95,000 ton I paid 1 mil harvest and mil.  
plus the boat 4 mil new 400,000 year .

ALL the electric is hydraelectric and is electric converted to cash.

I make the best toilet paper on the planet.  
I let the pressure off as quick as I slammed it in and that soft log  
expands like a cooked hot dog.

145,000 ton toilet paper at \$ 1800 ton besides 300,000 ton pulp at \$ 500  
per ton.  
My contract is \$ 500 I stay under market because they slapped 165  
million down so I could buy the forest.  
But I make more money per ton than everyone else. I still produced  
better for less and made the most money per ton because I got it on the  
ship without 3500 trucks per ship and pulp refined fuckin cheap .  
you wouldn't think 5 million for a chamber was cheap much less a row of  
10 of them.  
70 ton log each chamber.

epa golden star ..not much water and few chemicals to get a fluff .

I tested in small chambers first.  
I tried microwave ,,ovens ,

toss it in the sea green load it and compress it to 1000 psi and that  
green gets cooked .  
if you cook a log long enough in water it will fall apart.  
A turkey

A turkey gets done in 3 minutes at 1000 psi .

It fell off the boat and was the juiciest bird I ever ate .  
I ask him how many loads that turkey sat in and he said 1 load the  
turkey cooked off the boat in 10 minutes when the door opened.

Re: I love Seattle and the Tongass, more than anywhere else.

Re: I love Seattle and the Tongass, more than anywhere else.

its a pressure cooker .  
10 inch steel tank 12x80 .  
15 inch thick door  
900 ton tank.  
hits 1500 psi and simmers 3 minutes at 1000 psi .

I had keriboo out of the cooker.

The biggest popcorn I ever saw.

I wrap toilet paper in a vaccume to dry it.  
Its alleady hot and the roller adds heat so I dont use the queeze dry  
rollers it sucks ai into the roller and vaccumes out the water.  
That way I dont smash the toilet paper dying it.  
and only 1/2 turn of the roller has vaccume I blow it off the roller at  
one point and its a 30 foot roller 40 feet wide sheet craft white shit  
paper.

it runs threw the hang dryer loop timmer spicer and just befor role  
wrapers its slotted to make sheets and sliced and banks wide and runs to  
the role wrappers 1 pallet wide roles befor single roles get cut..  
hard pressed nonblached pulp tubes pressed dryed are wrapped pallet  
long and cut into roles then run down a packing line and bagged.

100 % automated .  
feed it and fix it.

.
