And you can't afford to pay for your military  
any more, so you won't  
make their pay checks soon.

Sol let the dollar slide, make it slide even, and you will have  
so  
many jobs you won't be even close to filling them.  
And then at that point the military will manage bringing in a  
migrant  
work force, which they will make profit from, to pay their  
wages, and  
you will get slaves, making you richer, moving you up a  
class, to  
where you can afford your houses and the inflation that will  
continue  
to be out of this world.  
Because whenever you try to buy goods from Europe, only  
the rich will  
be able to afford them.  
But what do you need from them except expensive prestige  
luxury items  
status symbols anyways?  
And if those status symbols go up and only the very rich can  
afford  
them?  
Gee won't that be too bad. The rich won't like that. Will  
they?

## Re: 8 lessons on shooting engineers

Watch the video, from South Korea!

Yes South Korea, the land of opportunity! And wise inventions, like the Brown's Gas generator!

Which splits water into Hydrogen and Oxygen so you can run any gas motor or welder or water heater.

See the video on this page. This is what you want to run your high speed trains with when you make new lines for freight and passenger service across America, with your migrant labor force managed by the military, from third world countries, stopping at each city along the way, and doing works projects for them, revitalizing America.

<http://www.browns gas.com/browns gas home.html>

What am I saying??? ! I mean that is what we are going to do in Canada.  
Fuck you guys.  
You are going downwwwn brother. You are goin down baby.  
And we, are going to be rich rich RICH!

And the migrant workers who come here to North America, for no matter what job, including cutting your lawn or doing your laundry, or building a dam or a railroad, they have to wear an electronic bracelet.

When they get home with their cash, they take the bracelet off at the gate.

We are not bad people. We just need to manage things better. We want to provide jobs for the third world so they will not be starving.

But in order for that to work, we need to control the currency levels between these two levels. So that when they come here, what will be little money is paid to them here, if they were to spend it here, but if they take it home, it is a lot of money.

So they just come here to get some money, and take it home.

This way they have jobs, we have labor, they get a better life.

Re: 8 lessons on shooting engineers

If they take their bracelet off, they are trying to enter a country illegally. And that is where we have been having all sorts of problems with illegal immigration. Immigration = invasion.

If you feel bad for the people who come here to work that they have to wear a bracelet, give them your money!

Then they won't have to work and they can go home with your money!
