It's all about patterns of moving energy. There are no 'particles', quarks or otherwise. Below are four of those patterns:

Methane <http://users.accesscomm.ca/john/spinningcoinsCH4.GIF>

Photon <http://users.accesscomm.ca/john/wavetrain2.GIF>

Chair form
cyclohexane <http://users.accesscomm.ca/john/ring.GIF>

Neutrino <http://users.accesscomm.ca/john/neutrino.GIF>

Re: matter and radiation are simply energy moving in linked rotations

Is there any subject that can be said you actually understand?

What do the words you just put
together mean?

Have you ever read any books?

Google 'noun', 'verb', and 'preposition' for starters,
and then maybe go from there.

John

Now maybe at last you'll understand how it is for the rest of us in
reading one of your own extremely incoherent and ignorant posts.
