only 22 million acres burnt on earth evry year for 10 years.  
80 million must burn or polution must take its place OR it wount rain  
and wount snow .

Cant have rain in pure clean air.  
No rain the planet warms up a bit and dries the forest out ,,then it  
burns and idiots put it out .

eviro morons want all forest fires prevented and the air squeekey clean  
..but then if 80 million acres dont burn it wount rain .

WITH OUT ANY MATH the green morons think greenhouse gasses from cars wam  
earth.  
100 million BBL oil is just 33 million ton carbon .

oil dont make enouph air polution .

In 1960 earth had much more air polution and had rain and it would snow  
on the poles.

It cant rain without polution

.
