As can be seen, the poster seems to be suggesting that Moses used General Relativity to part the Red Sea.

How else do you think Moses "parted the Red Sea" Gisse?

Nobody parted the Red Sea, Potter!

General Relativity is a theory invented by Albert Einstein which describes gravitational forces in terms of the curvature in space caused by the presence of mass. The fundamental principle of general relativity asserts that accelerated reference frames and reference frames in gravitation fields are equivalent. General relativity states that clocks run slower in strong gravitational fields (or highly accelerated frames), predicting a gravitational redshift. It also predicts the existence of gravitational lensing, gravitational waves, gravitomagnetism, the Lense-Thirring effect, and relativistic precession of orbiting bodies.

General Relativity has directly contributed to a \$30B+ industry, creating a global infrastructure benefiting people all over the world. Aviation, shipping, asset management, survey, mining, agriculture, time dissemination, communications networks, etc.

Bluster on, Potter, bluster some more you blustering old fool!

Sam! Sam!

Are you suggesting that unlike the Jewish leaders and authors responsible for writing and propagating the Torah, and creating the Jesus myth,

Re: Non-geometric approach to gravity impossible??

and other Jewish writers like Nostradamus, Karl Marx and Sigmund Freud, who sent mankind on long costly, wasteful, destructive pursuits,

that Einstein's General Relativity has not sent mankind on a similar path, and wasted enormous amounts of time, money and minds on such pursuits as time travel, worm holes, gravitons, warping through space, and the beginning and end of the universe?

Is that what you are trying to tell me Sammy?

A mind is a terrible thing to waste.
