Martin wrote:

Greetings folks. I'm developing a program
that draws 3D atomic
orbitals. However, I don't have a strong
background in this area,

Look up "contradiction" as a concept.

and
so I need an adviser. This would be
fee-based consulting. Anyone
interested please contact me at
mgcqso@xxxxxxxxxxxx

You need somebody deep into quantum mechanics –
certainly for heavier
atoms with spin-orbit coupling. Slater determinants are
hardly
starters. Monoatomic ground state vacuum only? What
probability
contour are you aiming for?

I see no "contradiction" here Uncle Al.

Re: atomic orbitals program

I see an entrepreneur who thinks that science has valid models for modeling "3D atomic orbitals", and he wants to provide the public with a means of viewing "3D atomic orbitals" of interest.

No doubt, Google could use a program like this that would appeal to researchers, as they could demand a high fee for the "AdSense" key words involved.

As he is willing to pay,
why don't you do the job for him,
and pick up a few bucks,
and buy a new car?

Better yet,
why not write the program,
and license it to Google?

Google is always on the lookout for schemes that involve high dollar ticket search words.

Tom Potter

Potter, you empirically haven't got the cerebral horsepower God gave a grasshopper's ass.

Uncle Al,
you are the one who claims to be more intelligent than Blacks, Latinos, Indians, Wogs, Chinese, etc., not me.

I am only intelligent enough to recognize phonies, charlatans, scams, and models that waste more time, money and minds than they are worth.

If you are as intelligent as you pretend to be, it seems to me that you would use a little of your superior intelligence and knowledge, to consult for mgcqso@xxxxxxxxxxxxx and earn a few bucks,

or better yet, write the program and license it to Google, as Google is always on the lookout for schemes that attract high dollar ticket search words to their sites.

Re: atomic orbitals program

Re: atomic orbitals program

If you did this,
you could buy a new car
and you wouldn't have to drive the
old one you complain about.

If you don't have the knowledge to write
the program, here's another good idea for you.

Contact the folks at "Pimp my ride."
