Both Einstein and Newton looked at the universe like this:

Absolute reality -> mind -> Relative Reality

Newton thought his mathematics represented absolute reality.

Einstein's mathematics are of relative reality.

Has anyone considered how to depict the entire expression (Absolute reality -> mind -> Relative Reality) with mathematics?

More philosophical bullshit.

It's a pretty clear challenge for mathematics.

Can mathematics replace the entire expression?

Why do you even post?

Do you have a bad attitude because you're trying to impress other people with bad attitudes?

Re: Absolute reality → mind → Relative Reality
