It took Einstein 10 years at least to do that.

Newton after several decades of correspondence on problems.

Copernicus took decades to develop predictions that had to be replaced by Kepler a century later before his ideas were accepted.

Correction Mike, your not Einstein, Newton, Kepler, or Copernicus, your arrogance astounds me... each of those individuals understood science you don't. What, you think Einstein just imagined GR with no knowledge of mathematics.... no of course not. Mike your the only one dumb enough to think just by imagining, and with as you have stated no knowledge of modern physics, you can revolution physics given any length of time.

Your just a wannabe physicist who thinks that his imagination is a substitute for knowledge...

Your argument is that if 4 years in hasn't revolutionized physics, it won't happen.

No actually my argument is that in four years you can't make prediction or answer a basic physics question mathematical or otherwise of any kind and that your theory hasn't progressed at all, therefore its worthless.... even Einstein was further then you after 4 years. Mike if you could predict one result in physics you'd be further along, you can't thus one can say you will never ever revolutionize anything, having to do with science.

Re: If someone just took a minute to listen to me

Re: If someone just took a minute to listen to me

Mike the only thing you'll revolutionize is the definitions of dumb, ignoramus, idiot, crank, and fool, they shall be redefined with definition 1 being: the act of being Mike Helland...

There is nothing remotely able to support that position in the history of physics.

And you have no support for your claim to be revolutionizing physics being a self proclaimed ignoramus on the topic. Not to mention incapable of understanding basic arguments, your statement not being my argument.

<snip>

I'm not your master or will.

true, your just a little insect which I like to step on...

Any time you waste in these conversations is a result of your own actions and choices.

Blaming me is pretty weak.

Oh no I am thanking you for providing me and everyone else with cheap entertainment...

<snip>

Cheers

.
