I think he did it with the help of mathematicians.

Yeah, nevertheless Einstein knew more about science and math than you... thats the point...

Einstein made significant changes to Newton's Laws of motion and gravity.

You need to know how that all works to fix it.

But you don't.

You don't have an understanding of EITHER Einstein's work or Newton's work that even approaches "good".

What I'm suggesting doesn't fix Newton's work.

It steps around it.

Through Leibniz's work.
