"Eric Gisse" <jowr.pi@xxxxxxxx> wrote in messa
Go away, Potter. You were not missed.

hanson wrote:
Eric, I did not give you permission to speak for me.
I like Potter. I missed him. But you are allowed to say:
"Go away, Potter. You were not missed by me, Eric."

"Tom Potter" <tdp1001@xxxxxxxx> wrote to Gisse:
<<http://groups.google.com/group/sci.physics/msg/a385186ed3fcf89d>>
I am very saddened to see...

hanson wrote:
ahahaha.. Don't be a sanctimonious liar now, Tom.
You are NOT saddened. You are angered because Eric
cranked you. So you gave him a lecture... ahahaha...

"Tom Potter" <tdp1001@xxxxxxxx> wrote to Gisse:
I am very saddened to see... [of which ther'se here a short
condensation of the lamentation by Grandpa Potter in his] ...
<<http://groups.google.com/group/sci.physics/msg/a385186ed3fcf89d>>
... that so many young high school grads, like Eric Gisse,
have been brainwashed to believe urban legends motivated
by racial and religious considerations, and that they hide
their heads in the sand, when they encounter FACTS that
run counter to their conditioning.
I suggest to people like Eric Gisse, [not to] accept what is
fed to [him] by advertisers, politicians, religions, race based
dogma, Time Inc, NBC, the New York Times, etc.

hanson wrote:
Tom, while you are quite right in your opinions and views
in your 2 links above, your suggestions to "people like Eric
Gisse" will run off them like water off Teflon. Consider, Tom:
Although there is only 1 world, we do live in very different ones.

So, let Gisse do his thing, let him act out and use up his
juvenility via his "halb-starken" behavior... ahaha... It's funny
to watch!... ahahaha... So let him enjoy it, because sooner
than he thinks the bumps on/in his head will tone him down
and make him realize that it was he himself who invited the
beatings he gets from the real world that he inhabits... ahaha...

Tom, Gisse will do alright!... Eric will go far!

Thanks for the laughs, guys... ahahaha... ahahahanson

PS:
----- NOT for Gisse's eyes! -----
To all you Geriatrics who beat on Gisse and who are one
shuffleboard game away from the old fogey home, I say:
:::: If you at ~26 were NOT, **at least**, as bad as Gisse
:::: is now at ~26.. then you poor bastards missed a lot!
ahahaha... AHAHAHA... ahahaha... ahahanson

As you often say hanson,

Re: What's better than Einstein's ideas ?

Re: What's better than Einstein's ideas ?

the newsgroups are 24/7 parties,

and the best I can determine,
is that the purpose of these groups
is to "get a rise out of" (Crank) folks.

You "crank" Gisse (And me) your way,
and I "crank" Gisse, Wormley, Poe, etc. my way.

I think your comment:
"Although there is only 1 world,
we do live in very different ones."
is partly true.

"We" are fermions at the physical level,
but "we" are both fermions and bosons
at the social level.

The Chinese Olympic motto is:
"One world, one dream."
(We are all bosons.)

and the motto of Bush and the NeoCons is
"Us vs. them."
(They are 180 degrees out of phase with us.)

both of which emphasize the boson nature of man.

Perhaps the fermion nature of man
can be quantized in terms of the linear, orthogonal
properties including space, time and x,
that separate individuals.

The bottom line is
that "we" are all reaching for the same zero point,
but differ in where we are with respect to that point,
wherever that point may be.
