America, without the aid of any Jews,
instituted what Tom Potter calls a Class War ,
moving native Indians onto reservations, killing them.

Have you ever heard of The Trail of Tears ?
http://WikiPedia.ORG/wiki/Trail_of_Tears
Humans need their homes and societies, losing them can be lethal.

What about those evicted from Iraq (and off the face of the Earth) ?
was it any different ? how were Jews involved ?

What about the long-established class system in India ?
Jews had nothing to do with that.

Tom Potter has indeed turned Jews into bogeymen,
blaming them (including Einstein) for every Class War that ever was.

How do you explain his half-asleep delusions ?
He's daydreaming, if you ask me, and the bogeymen are everywhere.

De Facto land Lords evict guests at their whim.. that's just life.
A victim's only choice is to Fight, Run, or Submit.

Deep down, I think Tom is complaining about taxes and regulations,
i.e. rent , to use my word.
All tenants are land Lords, and vice versa.

As I told Tom..
Governments that promote an ever-higher GDP at all costs
are no better than fat drunks who over-eat and over-drink.

Over-consumption is bad for the health of the global economy;
hence taxes are good, especially fuel taxes.

I've been taxed to hell and back.
I'm looking at 12 percent A.P.R. in interest and penalties
since 1989.. for the rest of my life.

There are automatic irrevocable liens (no judge can touch them)

The Trail of Tears.

against me.. they never expire.. to the tune of one million dollars.

My ex ditched me, I was catatonic, divorce was the last thing I wanted.
My progeny (born in 1983 and '84 in Orem Utah) are doing quite well.

The U.S. dollar is looking more and more like funny money every day,
past-due child support is just money.. it's mostly irrelevant.

All the same, I approve of these taxes (i.e. child support),
as it (hopefully) reduces the population growth.

.
