If you are interested about science earthquake prediction, please open here:

<http://earthquake.hit.bg>

You watch earthquake prediction in the Bulgarian newspapers, the new theory about earthquakes, forecasts for current Month 2008. More than 800 World locations. If locations are repeat, this is sign that the probability is more.

The moon make the tides in the oceans, raising the water. But the moon raises up the earth crust. In this moment the moon makes the earthquake...

With respect: Boyko Iliev

Correlation studies between moon phase and distance with earthquakes don't show cause and effect.
