Re: The Einstein Cult Index

No doubt,
people can
be
conditioned
to follow
a set of
"rules" but
to my
knowledge,
Nature
doesn't
follow any
set of "rules"
that
somebody
puts down
on paper.

They symmetry rules ver
"discovered" Potter!
http://en.wikipedia.org/wiki/Noether's_theorem

As can be seen from the 1995 post of mine
excerpted below,
although I have been posting about action
and symmetry for years,
I still maintain that "rules" are man made,
and "control" man and man's thinking,
but "rules" have no affect on Nature.

Excerpt from a 1995 Potter post follows:

=====
Light is not a property, it is the interval
between cause and effect.

Light does not exist in isolated (Unobserved
) quiescent systems,
although such systems possess all properties,
such as period, space,
mass and energy. Forces do exist between
the bodies which comprise the
system, but these properties are not light.

Re: The Einstein Cult Index

If we observe some change in a body or system, we infer that it has been affected by light (More fundamentally, bosons.) in some way. If the "action" of the system increases, we infer that we are observing some effect which was "caused" by some affect.

When we observe an effect, we look for a cause. Sometimes we attribute an effect to a cause that is microns away and sometimes we attribute it to a cause light years away. For example, we attribute the decay of a neutron to a very close cause, while we attribute starlight to a cause far away in time-space.

Now, both cause and effect involve integer amounts of change of action. Action has the property of angular momentum and units of "Planck's Constant".

So, we observe a system change by an integer amount of action and we call it an effect. We trace back the effect to places in time-space and look for correlations between the change of action in the effect and the change of action in that portion of time-space. When we find a large correlation, we assume that we have "discovered" our cause. (And if it proves out, we might even get a Nobel Prize.)

Re: The Einstein Cult Index

Although action comes only in integer amounts, it is a composite property. We cannot observe action directly, but must compute it from other properties, which are observable. When action is the product of two properties, one of the properties is called a "conserved" property, and the other is called a "homogeneous" property.

=====

The following excerpt from my 1988 physics tutorial also discusses the principle of "Least action".

=====

Action is time multiplied by the difference between kinetic energy and potential energy.
action = (kinetic energy – potential energy)
* time

Nature uses the least amount of action possible in affecting a change. For example, light beams take paths of least action, much as a person takes the path of least resistance when walking through a park filled with trees and obstructions.

Action is a measure of the change exchanged between systems, and it only occurs in discrete steps of Planck's Constant. A false, but commonly held, notion is that discrete amounts (quanta) of energy are exchanged between systems.

Re: The Einstein Cult Index

The quanta exchanged between systems is action.

The energy transferred between systems is a function of

both the quanta of action and the relative velocity between the systems.

The amount of energy exchanged between systems is affected by the relative velocity between the systems ("Doppler effect").

History

=====

In 1658, Pierre de Fermat (1601–1665) stated (Fermat's Principle) that light traveling between two points seeks a path such that the number of waves is equal.

In 1744, Pierre–Louis Moreau de Maupertuis (1698–1759) stated "in all the changes that take place in the universe, the sum of the products of each body multiplied by the distance it moves and by the speed with which it moves is the least possible."

In 1748, Euler wrote that a system of bodies at rest will adopt a configuration of least "effort".

About 1758 Joseph Lagrange (1736–1813) formulated a theory of least action, and the concept of least action was rigorously stated by William Hamilton (1805–1865).

Max Planck (1858–1947) elevated angular momentum to an important position in fundamental physics when he

Re: The Einstein Cult Index

postulated that the angular momentum of atomic particles occurred only in integer steps and that energy was conveyed from place to place in integer steps of angular momentum (Action).

=====

Sam raises a good point when he suggests that Einstein, with a proactive press, really screwed up the works, when they conned the masses into thinking that changes were conveyed from causes to effects in quanta of energy, rather than in quanta of action.

More and more lies. Ludendorff transported Lenin in the "sealed train". In fact it was a scheduled service from Zuerich to Petrograd (now St. Petersburg). Ludendorff ensured though that Lenin could travel through German/Austrian territory. They financed the Bolsevic movement. Ludendorff could, according to British law, have been convicted as an accessory to the murder of the Russian royal family. Impeccable anti communism though.

The Luftwaffe the proceeded to train in the Soviet Union of a quid pro quo basis. In 1939 Poland was carved up, the east going to the USSR and the west to Nazi Germany. Again impeccable anti communism.

Of course the Jews did it, the Jews seem to do everything. I think that Hitler who had teamed up with Ludendorff wanted to use the Jews

Re: The Einstein Cult Index

to divert attention from the murky past and the sealed train.

You say in your CV that you taught at a military college. I hesitate to ask what you taught or what your influence was. At the technical level I wonder how well they were taught matrix theory. The best way to add velocities is to take the Lorenz matrix, take dx/dt etc and then row into column. Different people might have their own preferences though, this way is the least strain on memory.

However Holocaust denial is to me the most serious matter. This in fact confirms all my worst fears about the military and the CIA. The Iraq war was caused by CIA lies on WMD. I don't know whether Bush could have gone to war in the US without it. Tony Blair made it absolutely clear in the House of Commons that without WMD the House would never have sanctioned war.

Of course the Jews started the Iraq war did they not. No, I think the Iraq war tells us something extremely serious and extremely alarming. War and peace is not decided in the White House, it is decided in Langley. Americans elect their fire chief and their sheriff. The supreme arbiter of war and peace, the director general of the CIA is unelected. The American people do not have a vote on the most vital of issues.

And what happened in Iraq? 4 million people are displaced. 1.3 million in Syria, 1 million in Jordan and the rest internally in Iraq. Admittedly they are not all dead, a good many are though.

Re: The Einstein Cult Index

The figures are certainly comparable in scale to the Nazi Holocaust, particularly as Iraq is a relatively small country. Iraq (and the US) have produced more refugees than ever Israel did.

They say the "surge" has reduced violence. It may have done. However people are not rushing back from Syria and Jordan. Iraq is ethnically clean and is likely to remain so. It is one of the major reserves of bigotry throughout the world.

The US military has compounded matters by behaving abominably. In Falluja the witnesses were smeared. The Arabic phrase is "beni al kalb" the sons of dogs. You were a trainer of the sons of dogs. I have called it the al kalb training. Al kalb is not taught matrix theory properly and denies the holocaust. Senior officers who are responsible are never court martialled. Bin Laden are more likely to be court martialled than other members of the set "beni". Two of the people at Abu Graib were bint.

There is I understand desensitization training. The military pay lip service to hearts and minds and then do something completely different.

I believe that the main reason for the Iraq war is the Mallory reason. The toys were there. It would have been better if relativistic corrections had NOT been made on GPS. I believe that in view of this Physicists should be careful in the support they give to the military. Students should NOT embark on a career of military research

Re: The Einstein Cult Index

if there
is any alternative. Students coming up from high school
should choose
a college, again where possible, without military
involvement.

They should NEVER be "good followers".

It appears that Ian Parker has a delay line built into his brain.

The thread is about the "Einstein Cult Index"
and Ian is talking about "Holocaust denial",
and trying to convince folks into believing that the Jews
did not instigate the Class Wars of the 1900's,

and Ian is trying to shift the blame for the insane
war against the Iraqi people that has destroyed
the economy and credibility of America,
away for the Jews that got Bush elected,
controlled him, and got him to invade Iraq.

No doubt, if the Jews manage to get Bush
to assist Israel in an attack on Iran,
contrary to the wishes of the American people and Military,

and Iran destroys the oil shipping infrastructure
in the Persian Gulf, and sends America and the
nations that depend upon large amounts of oil
back into the stone age,

Ian will be blaming Muslims and Christians.

As I have pointed out,
Jews Institutionalized Historical Revisionism
and they use Institutionalized Bigotry,
and a huge Mass Media presence to
"Jimmy Carter" folks (Silence and discredit)
to con the ignorant masses into believing their
Revised History, so they can implement their
greedy and selfish agenda. Money for Jews.

Face the facts folks.
Jews have come into conflict with all of their
neighbors throughout history,

because the migrate en mass to a rich powerful nation,
pool the money and resources to buy a few
of the nation's leaders, and use the leader's to

Re: The Einstein Cult Index

rape the citizens of that nation,
instigate conflict between non-Jewish peoples
in that nation (Blacks and whites, North and South,
Democrats and Republicans, Shiites and Sunnis, etc.)
and to wage war against external nations.

Jews are the ultimate killing machine.

They don't kill directly.
They get two sets of folks
who previously interacted in a symbiotic way,
to kill one another.

I believe in the theory of Relativity. What this thread has developed into indicates a hidden agenda. This agenda is simply this.

After WW2 the US government assured everyone that it was doing its utmost to capture and bring Nazi war criminals to justice. In fact the CIA set up "operation paperclip" whereby ex Nazis worked on the projects (notably antigravity and Aldebaran) that they had worked at in Germany.

Now the CIA did not consult any reputable scientists and if Relativity is true (it just happens to be) it follows that the CIA were sold a pup and that all the antigravity researchers, many of whom had committed horrendous crimes, should have been at Nuremberg. This is the long and short of it.

If a brilliant man is a wife beater, rapist or a criminal of any description one asks the question "Can his crimes be overlooked for the greater good?" Fact of the matter – there was no greater good. That is what anti relativists will just have to get used to. It should have been obvious at the time that they were simply spinning a yarn.

There is one further point. What about nazi influence in the CIA. All the evidence points to considerable infiltration. McCarthy was really a nazi and he got rid of good scientists and put neo nazis in their place.

Dawkins talks about memes. He talks with particular reference to religion although memes persist and spread in intelligence agencies more effectively than they do in the general population. You see NNs grant security clearances, NNs decide on who is to be promoted. The memes persist. Secrecy increases the stability of memes as there is

Re: The Einstein Cult Index

little scrutiny in the selection process.

I don't know where your Jewish conspiracy ideas come from. They do make a change from Apollo and explosive charges in the WTC. Well I do know, the fact you got your job is evidence enough. You certainly did not get it on pure scientific merit.

– Ian Parker

I take exception to Ian's statement:

"McCarthy was really a nazi

NOT physics.

Ian Dickhead Parker has made his position clear when he said "I believe in the theory of Relativity".

The fucking Pope believes in Jesus Christ...

Neither bigot has a hope in hell of proving his case, they merely declare their idiotic opinions.

.
