Tom Potter is wasting countless hours talking about General Relativity, telling us to not do as he does: wasting countless hours on Relativity.

If you're addicted to G.R., best not dwell on G.R. 24 / 7 / 365, best find something else to dwell on (DNA-tech ?).

Clock-Tech is at the foundation of all science, hard and soft, and it's hardly surprizing that:
clock-tech made a quantum leap at Einstein's 1906 Swiss patent office.

Fucking imbecile.

In addition, fucking imbecile,

- 1) there were no "quantum leaps" until the 1920s, and
- 2) $h=0$ in both Special Relativity and General Relativity.
- 3) Einstein was unhirable in Germany for being irritating.

You are no Einstein. You are not even a foxtail embedded in a dog's anus.
