Too bad, Potter, you waste your's writing political shit in a science newsgroup... Will you never learn?

Sam, the basic point is that anti relativity is political. I told you some time ago that it did not matter how much evidence was produced in favour of the theory. The rejection of Relativity was "political". I think this is amply confirmed.

There is one other thing that is being observed, and that is that as the evidence has been presented the anti Relativity theories have become more and more absurd. Light travels relative to the source. Well if that was the case we could never see double stars etc. etc. etc.

As I have stated the "Einsein Hoax" is organized. I did a Google search.

<http://users.isp.com/retic/physics/index.htm>

Look in particular at the user group log. This is clearly ORGANIZED. What they do is keep a record of all the threads and then post it and post it constantly. Two other references were interesting.

<http://www.jewwatch.com/jew-leaders-einstein-hoax1.html> Heil Hitler!
<http://www.biblebelievers.org.au/einstein.htm> So there IS a connection with Evolution

Thus the Hoax is inseparable from anti-Semitism in general. I get

particularly cross at the second reference. Here are people who call themselves the "moral majority". In fact they are behaving as an immoral minority.

There is also the nazi legend

Let us look at the company we are keeping. I did a Google search on the Einstein Hoax

One you get beyond the glam pusses and Nazi propaganda there are some very interesting articles.

<http://en.wikipedia.org/wiki/User:Piecraft/Jenseitsflugmaschine> From Wikipedia

<http://discaircraft.greyfalcon.us/The%20Vril%20Discs.htm> Aldebaran (khayyid?)

http://www.bibliotecapleyades.net/ufo_aleman/esp_ufoaleman_6.htm
2000+km/h endurance 5½ hr was absolutely absurd.

I think that one of the most serious aspects of anti Relativity is the value placed on scientific truth. Tom Potter and his ilk KNOW their arguments are all crap. The other extremely serious aspect is the fact that no reputable scientist was consulted on all this nonsense about Aldebaran. In "operation paperclip" the research was taken over by the US. Was that because they could not find a scientist who was "aldebaran khayyid" and would do what they said?

Thanks Ian.... I generally don't see "retic's" posting as the are easy to filter (on the content).
