The image from the reflected moonlight takes a month.  
the gamma moon image was taken from earth.

Only gold will reflect it. The steel can will absorb it.  
Its shure not much but 10 good moon nights  
can put a line on the film if theres gold to reflect it there.  
Take a pic beside the city dock I bet you find 100 gold pices 1pice at  
a time via xray photo.  
I bet you find a captains box from 1000 feet away.  
I know there's 100 captainsboxes there.  
1 photo should show them all.

.
