You're absolutely full of it.

Know-thy-enemy and snooker-thy-humanity is all that you've got going for yourself. Fortunately, the average American is so dumb and dumber that it's fairly easy to snooker those fools into an early grave.

Applied physics and technology as long since resolved issues of such pressure and temperature. So, what's your problem?

How many specifics would you like?

Regards, Brad Guth / GASA-IEIS <http://guthvenus.tripod.com/gv-topics.htm>
