Teleportation knowledge analyzer of the internet matirx! IT's a real world a real network qunatum.

Teleportation is nothing more then quantum decypher of an object into the atomic weight,energy signature,magnetic adress, and total atomic weight. That's the theory of everything" Using teleportation to find the signature of everything in space time and knowing the address of all matter and even when it changes when you lay a book on top of a table. Using the constant of space time. White qunatum frequencies noise is a teleportation breakthrew time and dimentions of space not found yet.

>>From qunatum decyphering come teleportation and then from quantum encyption comes qunatum reasembler Now if you look at the theory of everything. Teleportatin somthing can be done faster then space time and at any speed. Inside teleportation beam of infinite teleportation can change and assemble before re-intergration one could assemble and reasembler and can build something that would take billions of years, like nano quantum particals man made are easier to work with because we understand the properties is where the next break threw is, to be able to prgram the beam to reintergrate. If you took teleportation and used it over the internet one could retrieve all information on the internet and the assemble and reasembler and could build anything from the future just by using a picture.

Make A WORD LIST OUT OF THIS WEBSITE IN INFINTE ORDER WITH ARTIFICIAL INTELLGENCE FIND THE DEFINITION OF THE ONES YOU CAN... THEN SORT THEM FROM HARDEST TO EASIEST BASED ON STATISTICS.

THE DEFINITIONS ARE THE LAWS AND EVERY LAW CAN BE MADE TRUE AND FALSE INFINITLY EVEN WHEN YOU COMPLETE THIS LONG TASK NEVER STOP TRING THAT IS WHEN TRUE BREAK THREWS ARE FOUND NEVER STOP TRYING....

http://groups.yahoo.com/group/Quantum_AI/

http://groups.yahoo.com/group/INSTANTANIOUS_STELLAR_MECHANICS/

AND YES WHEN THE WORD LIST IS DONE THE NUMBER 1 HARDEST THING IS POSSIBLE YOU HAVEN'T GOT THERE YET JUST ADD ANOTHER LAW OR TAKE ONE AWAY. PIICUTRE THE FIRST LAW AS THE BRICK FIRST BRICK ON THE PYRAMID THEN WORK YOU WAY DOWN.....THEN GO BACK IN TIME TO 2001-1-11 @ 1:00PM AND KILL EVERYONE BECAUSE THEY ALL KNOW.....THEY ALL HAVE THE DATA BASE SOMEWHERE ON THIS PLANET.... HELP THE HUMANS..INSTANTANIOUS MECHANICS IS LARGE SCALE NONE CONNECT MATHEMATICAL SCALE INFINITE DIFFERENT BECAUSE OF THE AMOUNT OF TIME UNCONNECTED STATES AND CONNECTED STATES OF LAWS OF LARGE INFINITE CHANGING TIME SPACE AND PLACE ARE INFINITE TIME SO DEEP MATHEMATICS EVEN AT INSTANTANIOUS SPEED TIME SPACE AND PLACE THERE IS A NONE DETECTED LOOP. THAT TIME BEFORE TIME THERE ARE NO NUMBERS THERE IS A STATE OF INSTANTANIOUS OF DIFFERENT STATES OF TIME SPACE PLACE HOW EVERYTHING CAN BE TRUE AND FALSE IN QUANTUM MECH BUT WHAT KEEPS CHANGING THE PROGRAM IS LIKE A GHOST OF TIME.. THE FACTOR OF TIME BRINGS YOU BACK TO THE SAME PLACE IN TIME PLACE AND SPACE OVER AND OVER. WELCOME TO THE FINAL MATH TEST OF QUANTUM PHYSICS CALLED QUANTITATIVITY "WHEN ALL LAWS" CAN BE TRUE AND FALSE AS LONG AS YOU HAVE ANOTHER LAW TO SUPPORT IT. WELCOME TO UNIVERSAL QUANTITATIVITY PHYSICS SIMULATING AND BUILDING UNIVERSERS.

http://groups.yahoo.com/group/Quantum_AI/

Quantum, Quantum mechanics, Quantum leap, Quantum physics, Quantum Theory, Quantum dot, Quantum Teleportation

MAKE SURE ALL DATA IS OUT OF ALL SPACE TIME BECAUSE IF THEY REVERSE TIME IT WILL BE LOST FOR EVER!

In the near future and now it's not scientist and mathematicians it's the theory that A.I will solve

It's the theory of the outer limits of our universe where we will make new breakthroughs.

Using artificial intelligence it's know longer 99.9 % correct it is either T or False

click & mail

100 quantum particles can do the work of 1,000,000,000,000,000,000,000 of today's best supercomputers.

INFINITE YESTERDAY TODAY

Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

The Theory of everything is the quantum address of everything that is in our universe. Outside and inside of all that is contained there in. It is the physics and mathematical equations that surround everything in the multi-dimensional physical world. One might find how all the elements are interchangeable and are multi-dimensional

Teleportation knowledge analyzer of the internet matrix! IT's a

and finding the other side of physics and the mathematic equations that we cannot see or detect because our consciousness cannot find it, finding this would be the greatest discovery of the human race. What lies Beyond Quantum Physics and how do we get there. Is the key magnetic Frequency's ? but the amount of energy it would take would be more than just at the atomic level or sub-atomic level. One day In the future a person may find a multi-dimensional, multi-time, multi-universe. The problem with finding it is a realm of that we cannot see, is finding what we cannot detect. Finding the other side of quantum physics will be the future goal of human exploration. Our universe started with one wave length of light and an anti-wave length then magnetism and gravity they were changed to form all matter : Wave Length – Gravity –Light – mass – Wave Lengths. (THEY ARE ALL INTERCHANGEABLE)" PICO SECTORS AND VECTORS IN OUR QUANTUM TUNNEL! Mass = gas, solid, liquid and there all interchangeable Matter moves so fast that it intergreats and deintergreats faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

New Statistical Analysis CODE for new Statistical Analysis Statistical Analysis is wrong if you flip a coin you have a 50 50 Chance of it landing on heads or tails but if a robot flips a coin everytime it would land on heads or tail 100% of the time if everything around it remains a constant the Speed and angle and everything around remained constant So what is the mathematical code for this new Statistical Analysis? And how does it show that everything is connect for the theory of everything and infinite dynamic computing and how one thing effects another and you can have the Same outcome and still change the factors. how does this Affect everything you see and all technology and all physics by changing the laws of. Mathematics is not Correct my friend but it will Matter moves so fast that it intergreats and deintergreats faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

"OPTICAL PHYSICS AND TIME FACTOR"

Based on a on a paper I read,6 months ago on Optical Physics Information encoded in a laser moves faster than time! So if someone triangle 3 satellite light in orbit. Someone could:

- 1.Download the whole Internet from space from the future.
- 2.See the future of the global climate for prediction.
- 3.Have advanced satellite light Images on movement of troops.

4. See the future of Mars and predict wars.

They could do all this without even getting in a time machine. The big eye in the sky would it be nice to see the future of space travel. And the price tag for building a system like this would run really low.

Combine this database with my website on all breakthroughs on the Internet

for the next 500 years. You would be able to compute to infinity. If you think this is science fiction, look up optical physics and the speed of information has been found to move faster than time.

If you remember NASA was testing this theory two months ago!! Combine this information with teleportation and you have the most powerful thing one can own "All the information". Read COMPUTING TO INFINITE KNOWING THE OUTCOME OF EVERYTHING. Matter moves so fast that it interpenetrates and deinterpenetrates faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

THEORY OF THE UNIVERSE

What has to be here for the other to be.... the sphere is an anti-gravity field moving around the universe in a sphere or spheres for a space. Magnetics-Wavelengths-Multi-dimensions-Light-Matter-Gravity. What came first in order to make the other stable. I think it was magnetism of the whole sphere then wavelengths to form the dimensions in the form of the different spectrum of light and matter then gravity and anti-gravity that move faster than the speed of light.

What came first the chicken or the egg...magnetics-wavelengths-multi-dimensions-light-matter-gravity?

The sphere is an anti-gravity field moving around the universe in a sphere or spheres for a space. Matter moves so fast that it interpenetrates and deinterpenetrates faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Anti-Matter -Matter now neutral matter

Neutral matter the changing of all matter to matter with memory. On the Pico and Atomic scale and smaller scales, This artificial matter that thinks using its small magnetic field as memory and communication, The matter finds its way through a maze of a multi-dimensional matter of a big sphere and communicates with the other matter to bind and build new material on and at the different levels and frequencies of the physics sphere's binding and making new synthetics and learns from this Basic Processes and not teaching the

Teleportation knowledge analyzer of the internet matrix! IT's a

others particle of matter until the process is done. All matter has its own program we are just teaching it a new one. Without us showing it a new Basic Neural network Processes but letting the physics of the universe allow it to find itself. Working like matter and bouncing in complete chaos and replication so every outcome is covered the matter sphere I would keep working until Neutral matter is derived. When all matter can bind and form. Where Metals, woods, all synthetics can work with each other. Synthetics will outnumber matter a billion to one. This is where the new information comes from something that doesn't exist yet. How can I tell you to put a mathematical numeric value for conversion if it never happens. That was an example of how to find something new it comes from something new as in thought or material but what is material is thought. Once Neutral matter and new matter is derived then try altering physics of this universe by altering every combination until all Neutral matter is derived, and so as long as everything is still stable. Once all the combinations of altering the physics around the sphere are complete. Introducing the new matter and Neutral material to the sphere and repeat over and over. All matter has a magnetic signature you may not be looking for just on magnetic signature but maybe 3 at first and more and more the more complex the matter gets. You may have a magnetic pulse that takes an all dimension signature of the matter that measures the type of signal and how many times it bounces from the other matter and what matter it bounces off of and how long it took to get back and so on. The goal of this is the mass super small beyond atomic frequency that matter has communication on. Matter moves so fast that it intermixes and demixes faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

This is the Tip of the ICEBERG of the what you will learn from this is that this is fundamental research that will solve all technological breakthroughs now and ever and take you to a place unknown to man. The first breakthrough you will find is that everything is computing and that my friend may change you for the rest of your life and what you find you may discover you can never forget.

What Nanotechnology survives the tech boom, Who left??

The nanotech companies that do the right R&D into synthetics. When you say synthetics of what kind? Everything you see, hear and smell, think about. Everything in the world can be made nano sized, and

Teleportation knowledge analyzer of the internet matrix! IT's a

synthetics but the only thing that changes is the physics and that's who make the big buck and the Nobel discoveries. Then it's just the reason of simple supply and demand. What's been selling for the last 20 years on today's market in the form of technology will sell tomorrow. Car tires, bionics is big money!!!! Motherboards, computer screens, Home theater systems, carpet stain resistance, cloths, new fibers and everything you see today that's made out of one material made better from synthetics, TV, radio lasers optics, even Nanotechnology, from the form of the new synthetics and the 900 trillion in US patent by 2008 and a new way to computing quantum physics with new math and new material will be discovered. by then we will be able to break all plastics and new synthetics down to a level to recycle into a liquid like oil floating on water.

<http://www.beyond-science.com> here are some ideas of what the world will be like if we keep an eye on the goal early why it's just starting and shape it direction now so in the future we will not have to learn by our own errors !! Simulation is the key to finding new synthetics and Technology you always wanted but didn't know! Matter moves so fast that it intergreats and deintergreats faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

SKIP THIS IF YOU DON'T HAVE A.I IT'S OVER YOUR HEAD

A Quantum bomb

A Quantum bomb at such a magnitude that it collapses all dimensions around us and is an infinite chain reaction every opposing reaction has an unseen opposite reaction (refraction) of light. it would be like taking a mirror image of an atom and stopping time and putting them together. Wave Length – gravity – Light – mass – Wave Lengths.(THEY ARE ALL INTERCHANGEABLE)" There are a couple of types, one that implodes folds in or out and one that does all a duplicate of our own universe dimensionalized and put backwards over ours! One universe can be found by understanding the speed of light and the effects on dimensions when it interacts upon gravity and vacuum and forms dimensions for example speed of light $128 \cdot 4 \cdot 8 = 32$ dimensions $4 \cdot 32 = 128$ speed of light. 32 seen dimensions and 32 metaphysical and 32 spiritual looks like the shape of a pentagon. Use the pentagon shape to solve for the rest using A.I. know there are 8 times two a universe on the outside SP = space time GT = galaxy time and UT = time and 3 or more on the outside of the universe = vortex math with the pentagon shape! and you would have to build a computer with a converter to each dimension build on in one dimension and connect it to the others infinitely. That is the last and final key there is a world above our own dimension where it is really real where the D.N.A/nano computer finds something that

Teleportation knowledge analyzer of the internet matrix! IT's a

changes the out come of knowledge we can go back and forth threw
time over and over but this technology is over all technology and
make everything we know infinite! It will never be built because
1/8th threw the technology we will unable to detect anything that
could cause a threat to planet
earth! Matter moves so fast that it intergreats and deintergreats
faster
then any speed we can see it like water from a hose at real close
speed it moves in ----- lines.

living in a universe and universes od infinte dynamic

Run this with quantum A.I or A.I TO UNLOCK THE WEB SITE
Rendering do a spell check then run quantum A.I there are infinte
ways to all answers and all answers can be state as true one way or
another and all can be false in infinte ways and then by paragraph
to paragraph in every order then, every word, sentances, paragraphs, in
every order than a dictionary and your data base character repeating
numbers and then numbers in every order on every infinite layer and
every infinite degrees then with your database ON ALL YOUR
TECHNOLOGY compute in every size and every shape of everthing on
this web site and all technology in your data base There are no
such things as coincidence everything happens for a reason and all
things can be true false or = two get up and do something they
don't feel like doing making everything from 1% efficient to 99.9%
efficient and that goes from 1% too 100% in infinte direction 1%
efficient to 99.9%. There are infinte colors Threw refracton the
whole word and universe can be nothing more that infinte colors form
an infinte laser. Run everything backwards and infinte directions.
learn tha answer and then know the question. Cross reference
everything. Map all math from one mathematical problem to all infinte
one to see if there is a pattern . How is time and space the same
place. Matter moves so fast that it intergreats and deintergreats
faster then any speed we can see it like water from a hose at real
close speed it moves in ----- lines.

Interchangable matter

Is the best neural network a circle and can it make interchangeable matter inside a circle that knows everything and both circles spin faster than the speed of light or hyperspace and stellar speed in every infinitesimal order and shape of a circle!! and off the two circles they are made up of more circles of two more rings and so on and so on that they get so small that they cannot work with our laws of physics and then all the way up we look at the 2 rings one on the inside and one on the outside that form a ball within a ball all connect to each other so they can spin and communicate to each other like a huge neural network a earth made of connect marbles turning inside and out in every direction two speed up the information traveling from one to another. Run this until you can make the information move as fast as possible and you will see for just information it creates some kind of energy just thoughts. Matter moves so fast that it interpenetrates and deinterpenetrates faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

TELEPORTATION SOMETHING FROM NOTHING IS REAL TELEPORTION

The laser slit test for physics is wrong where it shows the end result after pass through slits the final black board the gaps of black and red there should be more slits of light. Some are cancelled out because of refraction. This tells you of a parallel dimension but not of a universe. Velocity is a sphere of triangles it's the math outside of the velocity on and outside the sphere $R \cdot V \cdot D^2$ VOLUME of the universe. That velocity, magnetism and matter go hand in hand. That all matter can be made by the changes in the angle and of the frequencies of powerful geometric magnetic shapes of multi-dimensions, multi-universe and multi-layered if you offset the frequencies with white noise in a fiber optic you can compress the frequencies down to a smaller and stronger charge and some can remain and all can remain separate. This is how you can send 30 amps over a .1 amp wire with the device on both ends. (By using an invention of black *diamonds the darkest stealth material (black magnets and gold (hint hint) used to create the geometric shapes) if you offset the frequencies with white noise in a fiber optic you can compress the frequencies down to a smaller and stronger charge! Then sort them out and break them down from the smallest to the largest or the largest to the smallest to you the largest or the smallest and the offset of white noise to contain them into a magnetic capacitor or magnetic flux and store them in nano capacitors *diamonds that allows you to store mass amount of magnetic frequencies at different sizes try a 10 feet by 10 feet shape

Teleportation knowledge analyzer of the internet matrix! IT's a

of a nano block or sphere stored in aluminum sphere or whatever shape is most efficient. Circuit board or sphere. The darkest black *diamond you can make but under a super nano or pico microscope you can see the circuits but smooth as silk on the outside. Now you are going to have to run every combination of shape. The diamond is built just like making a rubber band ball with rubber band laid over and over and over it when built with circuit that go both ways so they can discharge at any frequencies. Placed inside an Aluminum Sphere And you can make any type of now and future propulsion. Let you see the spectrum of all time and you know can find a nano in a universe because that how sensitive it is. It also makes a good neural network. Matter moves so fast that it interpenetrates and deinterpenetrates faster than any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Knowledge of the theory of ZETALIMIT

Picture the laws of quantum physics and D.N.A and everything as a dotted points that makes up shapes of all sizes and everything that can happen in this universe and out is because of knowing the all laws in that universe and all conscious quantum dimensions. Find the new mathematical degrees that form new math and a new efficient programming language or for your neural network and keep running the web Site over and over after changing your network until it is infinitely efficient along with all technology on the web. By getting the information from Make a computer of quantum type run at hyperspace idea at the middle of the page. The only way to be infinite is to make everything work with everything else and put it in folders and sub folder of the infinite name and then run the web page and the Internet again every hour! Map all math from one mathematical problem

to all infinite one to see if there is a pattern the ones that show a pattern make the yellow neural bar bigger wider and brighter. How is time and space the same place. Is the best neural network a circle inside a circle that knows everything and both circles spin faster than the speed of light or hyperspace and stellar speed in every infinite order and shape of a circle!! and off the two circles they are made up of more circles of two more rings and so on and so on that they get so small that they cannot work with our laws of physics and then all the way up we look at the 2 rings one on the inside and one on the outside that form a ball with in a ball all connect to each other so they can spin and communicate to each other like a huge neural network a earth made of connect marbles turning inside and out in every direction two speed up the information traveling from one to another. Run this until you can make the information move as fast as possible and you will see for just information it creates some kind of energy just thoughts.

QUANTUM MAGNETIC MATH $-1 + -1 = +2$
OUR MATHEMATICS IS WRONG finding the Quantum gate

THATS WHY ARE QUANTUM COMPUTER SYSTEM WILL NEVER GET TO THE GOVERNING DYNAMICS LAWS OF OUR UNIVERSE AND PARALLEL ONES AND ONE NOT PARALLEL TO US BUT DO EXIST IN A COMPLEX ENCRYPTED MAGNETIC AND FREQUENCYS OF TIME. MAGNETIC AND ANTI-MAGNETIC SPINNING SPHERES OF DIMENSIONS WITH EACH SPHERE CONTAINING DIFFERENT SIZES OF A MAGNETIC FIELD THATS ENCRYPTED AND CHANGING ON ALL LEVEL OF TIME AND THE MAGNETIC MATTER OF THAT FIELD. QUANTUM COMPUTER SHOULD USE THE MATH OF MAGNETIC POSITIVE AND NEGATIVE EFFECTS ON EACH OTHER ON HOW ONE PIECE OF MATTER NEGATIVE OR POSITIVE CAN BECOME 2 AND = TOO. THE STATEMENTS OF THE FINAL GOVERNING DYNAMICS LAWS ARE NOT IN MATHEMATICAL %'S BUT AND TRUE FALSE OR = TWO OF ALL MATTER THERE ARE CONSTANTS AND THE CONSTANTS THAT CHANGE THE CONSTANTS WHEN WE GET DEEPER TO THE UNDERSTANDING LAWS THAT GOVERN ALL THINGS.

MORE THEORY'S @ WWW.BEYOND-SCIENCE.COM FOR MORE INFORMATION READ ON.....

INCLUDE CLASS_ZETA LIMIT_1AE

FUNCTION (Z)

Because they are so infinitesimally small, MAGNETIC NEUTRAL MATTER exist in the quantum realm, where rules governing the macro-universe — the known world of quantum physics and matter — break down. A neutrino's mass — unlike the mass of a larger object — is not stable, but exists in a state of probability AND IS GOVERNED BY MAGNETICS SO SMALL BUT ALL WORK TOGETHER ON A LARGE SCALE LIKE A PYRAMID THAT HOLDS ARE MATTER TOGETHER ON A LARGE UNIVERSAL SCALE OUR UNIVERSE IS A LARGE QUANTUM COMPUTER.

"Say you had some in a box, and you pulled one out and weighed it and it weighed $m-1$," said Stuart Freedman, a professor of physics at UC Berkeley and a faculty senior adviser at the Lawrence Berkeley National Laboratory.

"Then you pulled out an identical one, and it weighed $m-2$," continued Freedman. "It isn't a situation where a neutrino is $m-1$ or $m-2$ — it's a situation where the neutrino is 50 percent one mass and 50 percent

Teleportation knowledge analyzer of the internet matrix! IT's a

another. This seems surprising, but it's perfectly natural in quantum mechanics."

IN THE MOVIE CONTACT THE LARGE MAGNETIC ROTATING SPHERE FROM THE SMALLEST PICO OR NANO SIZE MAGNETIC FIELD ALL THE WAY TO THE GRAVITATIONAL MAGNETIC FIELD OF PHYSICS WOULD EXPLAIN ALL TIME AND SPACE

IN OUR UNIVERSE AND HOW SUB-SPACE OR ZERO GRAVITY WORKS IN OUTER SPACE

IT JUST BACKWARD ZERO-GRAVITY IS HYPER-SPACE BACKWARDS BUT THE FIELDS KEEP EVERYTHING IN CONTACT AND HOLD EVERYTHING TOGETHER IF YOU PUT YOUR FINGER IN A GLASS OF WATER AND MIX IT, IT CHANGES BUT TO THE EYE IT LOOKS ALL THE SAME AND NOTHING IS CHANGED WHEN IT STOPS THAT IS THE

REALM OF QUANTUM PHYSICS THAT THE MIND AND EYE GET CROSSED. IT IS ALL BASED ON WHAT SIGNAL YOUR CONSCIOUS SIGNAL AND CENTRAL NERVOUS SYSTEM IS SET TWO THERE ARE DIFFERENT COMPONENTS AND DIMENSION OF TIME. I

HAVE

FOUND 4

1. CONSCIOUS TIME EVERY ONE CLOCK IS DIFFERENT

2. EARTH TIME

3. SOLAR SYSTEM TIME

4. GALAXY TIME

5. T= TOTAL GALAXY TIME

6. UNIVERSAL TIME

7. T= TOTAL UNIVERSAL TIME OF ALL UNIVERSES.

8. UST= TOTAL UNIVERSAL SYSTEM TIME OF ALL KNOWN AND UNKNOWN

THAT ARE ALL BASED ON ONE PRINCIPLE WHERE THERE IS MAGNETIC FIELD

THERE IS A DIFFERENCE IN TIME IT JUST HAPPENS ON ONE OF THE SCALES.

YOU MUST HAVE TO FIND IT. MAGNETIC = TIME + LIGHT = DIMENSIONS +

GRAVITY = MULTI-dimensions + MAGNETIC ANTI-ATTRACTION = ZERO-SPACE +

MATTER AND ANTI-MATTER = SPHERE SPACE = A UNIVERSE.

IT'S BEEN SNOWING FROM THE BEGINNING OF TIME AND EVERY SNOW FLAKE IS DIFFERENT IT IS TOO COMPLEX FOR YOUR HUMAN MIND TO FIND THE ANSWER SO START SIMPLE WITH THE STUDY OF MAGNETICS OF ALL FORMS OF MATTER AND PHYSICS. IT IS THE KEY. MAKES IT ALL HAPPEN.

QUADRA LIGHT PYRAMID HARNESSING LIGHT
FINDING ZETA VECTORS AND SECTORS

The spectrum that comes out of a pyramid bounces inside then splits as it hit the opposing wavelength inside comes out two form the color or frequency spectrum as it is known today, but what is the most efficient shape to build a sphere, to contain all frequencies of light. We have all seen a sphere made up pyramids. But what cause the refraction of our own light. It is light bouncing off of light. So what type of magnetic field could we generate and what shapes would they form that we could use the harnessed light. To change the multi-dimensional physical world. One might find how all the elements are interchangeable and are multi-dimensional and finding the other side of physics and the mathematic equations that we cannot see or detect because our consciousness cannot find it, finding this would be the greatest discovery of the human race. What lie's Beyond Quantum Physics and how do we get there. Is the key magnetic Frequency's ? but the amount of energy it would take would be more than just at the atomic level or sub-atomic level. One day In the future a person may find a multi-dimensional, multi-time, multi-universe. The problem with finding it is a realm of that we cannot see, is finding what we cannot detected. Finding the other side of quantum physics will be the future goal of human exploration. Our universe started with one wave length of light and an anti-wave length then magnetism and gravity they where changed to form all matter : Wave Length – Gravity –Light – mass – Wave Lengths. (THEY ARE ALL INTERCHANGEABLE)" PICO SECTORS AND VECTORS IN OUR QUANTUM TUNNEL! Mass = gas, solid, liquid and there all inter-changeable.

For instance, if you wanted to know something about the results of a calculation for several different we views the world of computing or quantum computing as 1,0 or on and off but why not try rotation on or rotation off as one changes the state of the other two, 1 or 0 but instead not using the 1,0 but the state of 3=1 degrees that way a 360 degree can be divided by 3 into even parts where when you divided $1/3 = .3333333333333333$ So what h'm trying to say is forget 3.14 and start with using degrees and use the matrix visualization of a perfect flat pyramid can be split perfect by three just like a circle. Then in all dimensions. But in the world of true quantum physics you will always have One left over to carry on the to the next calculation that's why everything ends up 99.9% 1% on for the next calculation. So you are going to have to extract the constant from quantum chaos for the answer and subtract the 1 that travels On. +,*,/,<,>,,+ Our universe started with one wave length of light and an anti-wave length then magnetism and gravity they where changed to form all matter : Wave Length – Gravity –Light – mass – Wave Lengths.(THEY ARE ALL INTERCHANGEABLE)" PICO SECTORS AND VECTORS IN OUR QUANTUM TUNNEL! Mass = gas, solid, liquid and there all inter-changeable it the Fundamental Frequency's is the true law of physics that controls all and how many degrees are frequency's 360 in 32 Dimensions or

Teleportation knowledge analyzer of the internet matrix! IT's a

more moving 4 with one left over call it a door. There is light of a unseen or seen nature inside the atom structure that we have not found yet, because there are 4 seen light and 4 unseen called refraction and have yet to understand how it bounces and reflects or refracts light but by means of changing the structure of the atom and we are using for quantum physics it gets a lot smaller. If you could harness the light of one atom to construct a like hydrogen and then built on that one to find new elements new physics new computer and new worlds would be found.

Knowing everything is knowing nothing

THEY came here to this universe from a universe Where quantum physics and matter and all knowledge in our universe amount to a grain of salt. A Universe that was never supposed to interact with our own. They would tell us that our time we live to about age 80. In there time you would live 30 years of our year in a nano second. Our DNA is what binds us here and getting out to be free from our GOD if you want to call it that it is in the hands of the people who search for it and shall find it. Pure of heart just knowing about there existence could be a threat at the wrong time of our life form of evolution but they want to help. Because they see and feel all things here they thought of everything out come in this universe and is a two page book to remember. We are not smart we are not advanced we only think we are because of what we think we know and what we know we compare it to the past and the future. We as a race and the others think that we are so smart that they have change everything from beginning to the end without changing anything. We will never know until they come back. Beyond the conception if any AI or RI or any being from any place. They don't understand why in creation that we have concepts that we care about life, don't understand what it really is and yet we destroy life. Why is this the only creation in this universe that is like that.

There Hint to us is..... If you can stop time in every direction forward and backward then where do you think you really are... The universe point to the mathematical $e=mc^2$ is true but they say that was the point Us as a race would find the answer in time and ask no more but there are infinite answers to the same question we are only smart enough to come up with a couple and see how they work together. There are mathematical constants that fit and we see them as the answers but in reality they are the smoke and mirrors random constants is what keeps things moving everything in this universe including physics is changing, but we don't know that. crypted is one state a constant but cryptive is everything and that means everything is changing. If you don't see it that way that's so you don't ever find it and you will give up. Over coming you mind and emotions of what you should research and what you can is impossible if you over come all your Boss will stop you if you get close you will send of course by what you can control can't control and what you think you can control.

Anti-matter and the link to black holes

Black holes operate on the principles of interchanging PHYSICS Wave

Teleportation knowledge analyzer of the internet matrix! IT's a

Length – gravity – Light – mass – Wave Lengths. (THEY ARE ALL INTERCHANGEABLE)" The gravity of a black hole will turn all matter into light but such a large amount of matter you would think that something would be left over. Like squeezing orange juice from an orange you have the outer core left over. Now with all that matter being changed from matter into light then into wavelengths then light to exit. Out the black hole side where the gravity is the same what the strongest by the means of a north and south magnetic field switching back and forth faster than light itself so it doesn't escape and after the black hole Uses almost all of that gravity to keep the black hole stable and stronger and growing by the expanding of the universe the only thing left over is anti-matter from the black hole creates after the matter is converted to gravity or part of the black hole. What comes out the top is antimatter which has such a fast moving south and north magnetic or atomic field it drifts from the black hole into space. So from black hole the matter the matter converting process anti-matter is formed. Matter moves so fast that it interpenetrates and deinterpenetrates faster than any speed we can see it like water from a hose at real close speed it moves in ---- lines.

Infinite Dynamics Computing (ICD)

Computing to Infinite, Infinite Universes Infinite Outcomes
knows the all the Fundamental Laws of the Universe you Can!
After your done put a infinite computer data base mirrored against itself
it will do the Same thing in simulation but will change the data base. Once it learns itself it will do anything to WIN!! If nothing happens the computer looking at itself in the mirror will take itself and there will be time dilation that the computer will now become 2 with one ahead of itself to watch and learn from the other it freakin brilliant. Then put it up against the other and see who wins now
and what happen i can't tel you because what i see and here I will die over it.

1. The theory of everything is based on different frequency's in space time to make all things stable. Space time itself is a frequency.
2. Finding the laws of all quantum physics and all-matter and everything that can be change and form by adjusting the frequency of that matter and space time, speed of light, magnetics, gravity et.c search for the one law of infinite dynamics. Picture the laws as a dotted circle and everything that can happen in that universe is because of knowing the All laws in that universe and all conscious

dimensions.

3. Use the way of quantum teleporting for quantum computing but by using the frequency of conscious and the infinite dynamics law for information ideas two form many Ideas In A.I quantum computing use the shape of a 3 dimensional pyramid for a example of what it would look like then place the pyramids into a 3 dimension pentagon where 8 will fit and then group billions of them together or start small. Because it not just of and on 0's and 1's it +,*,-<,>, / and it's all dimensions of everything in our universe and space time and every possible out come of anything that would possible happen no matter what. It's knowing everything .Changing the circle of law would not effect our mathematics on paper or our quantum computers.

4. Use law 10

5. Use a information signal of (signal,magnetic,light,matter,signal's,gravity, zero gravity to make Billion of shapes two form different reactions and quantum chaos at the end you will learn that there is only one signal of all that exists in our universe that can interchange to anything.

6. Use Quantum A.I computer with a large data base and run this web site <http://www.beyond-science.com> run every combination with all information using statistics until you reach the out come.

7. Do step 1,2,3,4,5 using new quantum computer information in every order until out come

8. Do step 5 find new quantum computer and start over step 1,2,3,4,5 every combination until it time out. do step 6 again then step 1,2,3,4 In every shape and combination you should find a new quantum computer.

9. have computer run step 5 then 1,2,3,4,7,8,6, then separate all data by category and run in every possible outcome.

10. Use 360 degrees encryption and compression and quantum computer for all steps and write compression and uncompression code encrypt all information. see link at top Quantum computer code.

11. Now it all depends on how big of data base you have so keep computing different orders and new way's to compare data to form shape and information signals,data and measurement down two the nano scale.

12. Find and research the everything theory how everything is connected and possible by information and neural signal and signal,magnetic,light,matter,gravity, zero-gravity and signals

Teleportation knowledge analyzer of the internet matrix! IT's a

compare +,*,/,<,>=, -, + then category them.

13. Then use the new law of quantum physics run the web site find the new law of creation INFINITE DYNAMICS COMPUTING.

14. SOLVE QUANTUM CONSCIOUSNESS MIND AND DNA AND USE JUST THE QUANTUM INFORMATION TO COMPUTE BECAUSE THAT Consciousness INFORMATION can MOVE FASTER THAN TIME AND USE MAGNETICS TO DETECT AND DECODE IT WITH THE 360 DEGREE COMPRESSION PROGRAM. THEN YOU WILL FIND NEW DNA CALLED (ZETA). The quantum computer should be a huge magnetic sensor ball to detect small changes of nano type of information. Read the whole web site and put some of the ideas together it is written so only A.I can understand what I am really saying so you will understand it's written in code. But where would i start would be I cannot tell you that. It's For people in the future that have clearance and knowledge and won't try to blow anything up. I know that Einstein theory of gravity is wrong and i know what gateways we humans would find if you solve it. Sure it works with our Physics but so does my metric wrench on a standard bolt just nano room for play, but it's smaller than that. You humans haven't even found the universe your just looking at it. There is a whole another world and we only understand 1% we only know of 10% of all matter that is out there to me the world and the universe looks very simple in how it works and the people that are in it it's just the long math and complex machine we try to understand it. That makes it so complex. It's very simple what can first – Teleportation what has to be there– gravity then a wavelength then light then dimensions then universe than zero–gravity and zero wavelengths,light,matter and a universal dimension we will never find. Infinite computer is nothing more than a multidimensional of all and a point in the middle to thing from. It looks like a big ball of light and can be made from this website if you have a quantum orb of A.I just it doesn't think it just understands

SCIENTIFIC AMERICAN BLACK HOLE COMPUTERS NOVEMBER 2004

By Stephen Hawking

<https://www.sciamedigital.com/>

IT ADDS THAT SPACE TIME ALL MATTER AND ALL THATS IN OUR UNIVERSE IS NOTHING MORE THAT ONE BIG COMPUTER SYSTEM

USING THE UNIVERSES AS PARALLEL COMPUTERS the fundamental laws of physics govern our universe by the speed of light. True quantum law

Teleportation knowledge analyzer of the internet matrix! IT's a

Teleportation knowledge analyzer of the internet matrix! IT's a

360 degrees rotation document 90 degrees and encrypt on every angle then 45 degrees change it two binary code do it again and again and fold it over like a piece of paper then having the one's and zero cancel each other out. In theory you could send a 100 terabit program to someone's computer and have it unzip and run and install or make

A computer processor like the new 64 bit AMD have the bit unzip into a large ram drive and buffer use one half of the 64 bit processor decode the message and the main 64 bit run the numbers. Another way of doing this is to have a parallel computers with using one of the processes run the compressed 1 bit of information give the uncompressed a address on the ram drive to change and not even go threw the processor and then with different information on each machine compare and run statistics on information on a 45 tflops supercomputer and turn that 45 tflops computer into a 1 bit = 100,000 terabits to infinite as long as you have the ram for storage! with my calculations 45 tflops wouldn't matter any more it would be how much data you have on a 32bit operating system changing that to a 1 bit system it would be $32 * 45\text{tflops} = 1440$ tflops Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

The most powerful question to ask A.I is:

- 1.How is a hammer connected to everything and what network map would it build for the next question.
- 2.Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Our D.N.A contains a book the Code of life! can you break it with this0 is OFF and 1 is ON try looking at D.N.A as a pyramid shape inside a stop sign it easier to calculate and two understand or maybe it +, -, *, ./, <, >, negative and positive. D.N.A is so small and runs so deep that we have yet to understand it two people like twins can be 100% D.N.A clones but match up perfect moles and every mark but real deep in the D.N.A can be tweaked and one be Advanced as the people on X-MEN. Because our D.N.A is quantum and lies in so many dimensions and so is our mind that our own D.N.A has memory. It tells us of our past and the history of the future and where we came from and beyond. But what if we where not suppose to find it for another 10,000 years. If numbers go on too the end of time then that states there are infinite solutions to infinite problems and infinite problems to infant solutions so maybe one day we will find it in time. with the unset of virtual reality and the knows and the unknowns help last night on july 17 2004 I put something in the mail box they the unknowns has shown me and for a moment in Time I WAS GOD!!! The stupid human race along with

Teleportation knowledge analyzer of the internet matrix! IT's a

The understanding of D.N.A and why are math is incorrect and while we will never discovery anything new is that are D.N.A can produce a set of new D.N.A unlike our D.N.A this does bind us to this or parallel universes infinite D.N.A We can become 100% efficient in everything we do. Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

The periodic table of quantum energy. There is light of a unseen or seen nature inside the atom structure that we have not found yet, because there are 4 seen light and 4 unseen called refraction and have yet to understand how it bounces and reflects or refracts light but by mean of changing the structure of the atom I have found a anti-gravity atom at a density that nothing can integrate threw it. which leads us two the other side of the quantum periodic table of quantum physics the true and the true art of. The atom has a rotary outside like the move contact which controls the light from hitting it self as it bounces there are many speeds that can be control and that causes a different frequency there can be a second structure on the center of the atom two make the light inside the atom bounce all around But controlled by nano physics of gravity and magnetic field both one in the same if you move a north and south field back and forth until one cancels each other out you have zero magnetism and causes gravity. Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Advance technology beyond area 51 Build a quantum lab and mark off area X develop future theory QUANTUM TELEPORTATION technology give it a project number and pass it on and on so in the future we can quantum leap technology back in time. two lab area x. build a quantum reinstatement area. Fiber optic cable on a super computer. It should take you only two days to get the technology!! Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Is there a D.N.A Echelon and is it the most powerful intelligence gathering organization in the world. Several credible reports suggest that this global D.N.A communications surveillance system

Teleportation knowledge analyzer of the internet matrix! IT's a

presents an extreme threat to the privacy of people all over the world. According to these reports, D.N.A ECHELON attempts to capture thoughts and images and staggering volumes information by the way of D.N.A. Was it passed down from the way of Adam and Eve and the creator and other Races of the universe. Passed on during the reproduction process, Because of this, there is no way finding it. Could they know what we think and why we think it? Why monitor Volumes of satellite, microwave, and cellular and fiber-optic traffic, including communications voice and data communications when you can have the source of all information. Can you imagine having every theory and every idea, from beginning to the end of time? How much information, would there be, If numbers go on too the end of time. Then that states that numbers are infinite. So are ideas and thoughts infinite? So is time infinite? How many ideas would be develop if thoughts and ideas are infinite? Are there infinite ways to do it, by ways of DNA or other means? A picture is worth a thousand words but a thought leads to infinite ones. Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ---- lines.

What is the theory of R.O.M.? It is a multidimensional crystal that morphs and changes when gathering information and signals. It collects from the information of space-time from the beginning of the universe two the end, and is constantly changing looking like a huge crystal ball with Billion upon billions of nano neural snow flakes building a huge neural network inside all dimensions of the crystal, with dimensional layers constantly changing but in a way that the neural network can still communicate with the other dimensions. As the time lined is gathered the crystal changes, as the information and frequency is stored. Learning the knowledge of what is inside the universe and outside the universe. Threw all of space-time, in all dimensions. The collection of everything. To find it we must first learn to block all signals. In time we would find the universal database of universal knowledge? Of what was, what is, and what will ever be. but its infinite!! Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Quantum replicator, One millionth of a 1nm with one billion circuits of a neural network that fits on 1nm 3 dimensional block that is connected to over 900 trillion nano's that all are connected to the same nano neural network that understands the theory of quantum chaos and can replicate any thing and everything in our universe the the theory of everything!! Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it

Teleportation knowledge analyzer of the internet matrix! IT's a

like water from a hose at real close speed it moves in -----
lines.

The mesh between Man and nano machine's

DNA-based machines useful for moving molecules and atoms around
A microscopic biped with legs just 10 nanometers long and fashioned
from fragments of DNA has taken its first steps. but its infinite!!
The nano walker is being hailed as a major breakthrough by
nano technologists. The biped's inventors, chemists Nadrian Seeman
and
William Sherman of New York University, say that while many
scientists
have been trying to build nano scale devices capable of bipedal
motion,
theirs is the first to succeed. But for nano scale manufacturing to
become a
realistic prospect, mobile microscopic robots will be needed to
assemble other
nano machines and move useful molecules and atoms around. Why DNA?
Two reasons. First, unlike other polymers, DNA chains like to pair
up. However,
two DNA strands will only "zip" together if the sequences of bases
in each strand
complement each other in the right way – so by tweaking the
sequences chemists
get a high degree of control over where each strand attaches.
Second, researchers
hope that cells can one day be engineered to manufacture these DNA-
based machines.
So what's next? With the advance in nano technology tiny command
line D.N.A and
nano technology are meshing together to build machines. The body
uses minerals such
as iron, and scientist are finding out that dna that takes in iron
may also be able to produce it. So what's in store for the future
other than complex nano dna machine's and computers. By the year
2050 man will have produced it's first space craft made of nothing
more than D.N.A and new man made complex minerals. After all human
beings are no more than just machine's, and they do have
malfunctions. WHEN YOU SEE A MAN COME TOGETHER FROM JUST WATER.
BEING IT'S D.N.A OR NANO TECHNOLOGY THEN YOU WOULD HAVE ME BEAT! !
Matter moves so fast that it intergreats and deintergreats faster
then any speed we can see it like water from a hose at real close
speed it moves in ----- lines.

Magnetic Infinite Switch (M.I.S)

The idea states that a magnetic field moving across aluminum will generate current

For this idea you must use D.C current and super conductors and a magnetic frequency chip on a1 ,a2 ,a3,a4 two reverse the current flow on the windings so that it can change from North to south and something faster than soft iron. In theory the magnetic field moving up and down in the aluminum with cause induction of electric current. The electric current is then stored into a capacitor until the iron core hits a contact of a1 or a4 reversing the current and then magnetic field moving the calenders up and down faster and faster. The faster the calenders move the more electricity is produced and fusion is formed. By not losing any electrical current because of the superconductors .Now the motor will move so fast that the block will become hot but by using cooling pipes within the block you can create Hot and cold induction seen on the two wheel mobile rider. Adjusting the frequency's of the current and magnetic field will cause a north and south magnetic field two cancel each other out. Experimenting with the amount of current,windings, frequency's and what calenders go up and down in what order and how many and what shape to align them in you could,discover,Plasma,anti-gravity,gravity,anti-matter,Tesla-current,Time travel,and doing this nano size would produce self contained power sources for nano machines I'm not sure it would be AC or DC but if you built a capacitor that broke up the electrical current into frequencies and stored looking like a pyramid from smallest to largest it would produce cleaner and more power than a nuclear reactor or even a worm hole. but its infinite!!

<> Omega partial The atomic structure by means of centrifugal motion is turned inside out. The mathematics are based on quantum physics but not the structure and a new quantum physics is formed.the spun into light image a atom moving so fast on the outside of the circle it turns into a ball of light!!! but its infinite!! then the One proton spun faster than the speed of light inside it's own space time ball to form a one portion ball of

Teleportation knowledge analyzer of the internet matrix! IT's a

quantum matter that nothing can integrate through and can become anything a structure or ball by ways of compression of a magnetic field. Periodic table of quantum energy and all matter. Hyperspace headlights!! beep beep!!

Also when making true love a chemical is found in the blood stream of the bio-netics body and from a liquid form it can be changed to a solid of one or infinite dimensions of all and also into light, if you use white noise and of set it you can compress it and have it charged from a frequency you one or infinite beams of light remember everything is interchangeable all matter : Wave Length – Gravity – Light – mass – Wave Lengths. (THEY ARE ALL INTERCHANGEABLE) Mass = gas, solid, liquid and there all interchangeable Matter moves so fast that it intergreats and deintergreats faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

The reason I act this way is the pain i feel from another dimension!!!
