Hmm, at least one article I've read on this seems to indicate that supplemental oxygen helps far less than oiriginally thought. Mostly because people on it tend to prolong time at altitude which increases their brain damage. But I can't find that one.

Sorry, but you're a little behind the times.

<http://www.everestnews.com/stories2005/everestcopter05272005.htm>

A helicopter has landed on the summit.

So, does that count for my 3rd t-shirt?
