Did you ever see a F-117 close-up? It looks fakey. They put some sort of RAM tape over all the junctions of the facets, and it looks for all the world like it's made out of sheet plywood that's been duct taped together, like some cheap Hollywood mock-up used for a special effect in a B movie.

Pat

Maybe it is! Just another disinformation campaign. I'm sure really the money was spent on an orbital bombardment system, and when some target is destroyed they say they used the stealth fighter. Or they really use the HAARP with low frequency waves bouncing from the ionosphere (all radio operators know this) and concentrating on one point on the ground somewhere on the other side of the Earth.
:-)
