I'm in there under that black spot; as a quick first guess by eye, maybe 1/3 of the image width from the left, roughly centered vertically. On the ground, alas, but otherwise it was a damn fine view from the southern shore of Turkey near Side.

Did you happen to notice the shadow as it approached over the Mediterranean? I've heard it's possible to see it. I was in Side, but in the heat of the moment I was too busy looking up.
