polite?

"As it is, it's useless for Usenet"

snip

Your ignorance is demonstrated by the following reckless statement

"And losing seven astronauts in a Shuttle accident wouldn't put a crimp in Shuttle flights if we were rational about it."

snip

I doubt you took the time to understand the information posted, but instead reacted emotionally by posting a reply not even acknowledging the point at hand. My post is providing the links and sources, giving you plenty of information for your own knowledge, and verification. I have found this information quite helpful and thought you might find it helpful as well. But a pretentious statement claiming an executive summary is necessary for your understanding in the matter of space craft safety is quite childish, and deserved to be called out. So you can cure your own ignorance, or cling to it the choice is yours.

.
