I don't remember the P/W details, but it was the same general story: the fancy grappling hardware didn't fit, but \*this\* time there was a hands-and-arm backup plan, and it worked.

....This was that long "I" beam sort of device, with the auto steering wheel attached slightly off-center? IIRC, it's now hanging about 20' up in the air in the Skylab gallery at JSC's Space Center Disney. Most people don't know it's there even though it's lit up.
