The Soyuz may have a history of doing odd and dangerous things, but by God, is that one tough little SOB.

It's going to do its damndest to get you down alive, even if you end up rolling down a mountainside like in this case, or getting most of your front teeth knocked out, like on Soyuz 5: [http://en.wikipedia.org/wiki/Soyuz\\_5](http://en.wikipedia.org/wiki/Soyuz_5)

Or acting as submarine:
