WHAT'S NEW AT THE SPACEARIUM (<http://www.spacearium.com>)!

What's new for June, 2008

The Spacearium this month has stories and multimedia coverage of:

- Space shuttle mission STS-124 delivers the Japanese Kibo Pressurized Module laboratory to the Space Station
- NASA's Phoenix Mars Lander mission successfully touches down on Mars and finds water ice
- The next-generation observatory, Gamma Ray Large Area Space Telescope is launched from Cape Canaveral
- Helping the study of Earth's oceans, a United Launch Alliance Delta 2 rocket carries the Ocean Surface Topography Mission / Jason-2 spacecraft to orbit
- The U.S. House of Representatives and Senate send a strong signal to the White House by voting to increase NASA's 2009 funding by \$2 billion and add an extra shuttle flight to the manifest
- AND MORE SPACEFLIGHT NEWS!

GIGABYTES OF VIDEO, INCLUDING DOZENS OF HOURS OF VIDEO FROM STS-124 AND THE PHOENIX MARS LANDER MISSIONS. IMAGE GALLERIES FROM STS-124, GLAST, PHOENIX AND JASON-2. WATCH NOW AT <http://www.spacearium.com>.

And our daily (mostly) space news video podcast... the Daily Space Update. Watch now!

Our spaceflight news coverage originates from Kennedy Space Center and Cape Canaveral, Florida. The Spacearium is owned and published by Space Media Corporation, a wholly-owned company of the Aerospace Research & Engineering Systems Institute, Inc. and is the only publication dedicated solely to coverage of spaceflight headquartered near the space capitol of the world... Cape Canaveral! This position gives The Spacearium a unique opportunity to provide exclusive multimedia offerings not available anywhere else.

The Spacearium (<http://www.spacearium.com>) is a portal providing news and commentary about space exploration and development. Visit The

Space News and Multimedia: What's New at The Spacearium In June

Spacearium today for current news, mission information, an extensive collection of multimedia, e-books, image galleries and more, all of it free. Watch exclusive video and photos shot on-site at Cape Canaveral and Kennedy Space Center. Full-length rare feature movies are also available from our streaming server. If you're interested in technical material, you can browse our collection, including the full set of NASA SP-8000 Space Vehicle Design Criteria monographs, select books and historical documents, a mirror archive of rec.models.rockets and more.
