Christian Ramos keep going man dont let these fossils get to ya. We know what cretins they are. Ya can find them talin about the report ya mentioned all over the net. Hears a line its a "total study of the construction and operation of a dededicated Tourism facility on the moon". Even the dweebs at NASA has stuff on it.

dont treat em nice give it to them. Go back to the thread dont back away from them. They always row out the propreitary crap to support their corporate masters.

All the shits around here think off is that spending money on big rockets is important. noone cares we all just want to be in space. Hes lying about tha american studies too they are all about rockets as ya said. Dont fall for there bullshit man.

Their just cowards without a clue man they rewrote the thread to stuff ya didnt even write and made out a new bunch of crap. Too cowardly to do it when ya can respond. ya wont get nothing from email either too stupid to do that cant impress their friends that way.

How come when they wouldnt answer any questions ya asked and let him get away with inventing new crap. dont hold back man Im telling ya this is newsgroups stick it to em. This is the standard tactic theyll bury ya. they cant even prove the mighty Simberg as a expert hes juts a pompous ass as ya said. Cant do anythin like real people like Burt Rutan.

theyre claimin a google conspiracy ate simberg posts. Any moron can search and see hes never posted anything of relevance just funny little attacks

So dont let the loosers get to ya. Dont go away thats what they always try and do drive away anyone that

sci.space.policy: Support from the lurker

doesn't agree with their garbage

Oh and start of a thread on SPS we need to talk about  
real things not their crap.
