finding the multi-plex time and volume of the earth you can find the universe volume and time!! A.I =/2

You have to start all over agian with this t3chnology bulid A.I and a new quantum computer or supercomputer is the only way to get this to work from the computer to the qunatium computer al the way to the technology on this web page and then do it over agian ever law is wrong all physics math and geometry (infinte degress math leads you to a new mathmatics that not of numbers but more of a code 333.333.333.333 but in more then one dimensions this would be a new software compiled on the new computer that instead of using binary it uses it uses the left over computations and ram to run the program so if you had a 10 tera hz dell desk top it would run at the maximum limit @ 1%

Quantum cryptography Run this in every order 1 correct outcome Run the web site with every word and every order and ever letter in every order then every paragraph then and number and do that in every order. Everything is possible one way or another anything, any you can tell it to build anything and it will be possible. Less is more Examples: with a stick if you can make a car drive if you push down on the gas pedal with it. This proves the real "Theory of Everything" and builds a huge data base of information. The more information ,The bigger the neural

network and just keep adding more to it because anything is possible and new things can be found after this is done. By using The new ideas and the information you now can run everything back wards and then forward but now by not just adding but by +, *, /, <, >, =, -, + then finding how all things can be 100% true if there not then your not doing it right. Then run this in every order and change the neural network to be 100% efficient in making all ideas. After your done use the code to turn one Law, definition, on and off like math, and matter, and all the word net technology dictionary and then turn them off in every order on the website then build a separate quantum neural network to store all the information in then just run it all over again do it over and over with the new math and information on the website it will generate new laws of den's and math and quantum and stellar physics more. run the laws the new laws that changed see by what percent they are true by using % and digress $3=1$ 360 degrees = 3 but is in every infinite angle and degree until all = 100% only use your data base to help generate new laws. But by running the neural network with words missing and laws missing. It will make new laws until all is 100% true learning way outside the realm of A.I or R.I. finally ...Then with my matrix program run the neural network With my own Matrix code and Artificial intelligence with this bunny encrypted website by starting with one dimension up to infinite and every angel and shape start with a box and every degree every number letter and word it will keep growing and so does the database. After all is done all laws can be T <, >, = and false. Then do it all again but this time with everything on the internet all data. Then have it ask it the simple question on everything that is T <, >, = and false. Who, what, when, where, how. Based on your new neural network what is? All laws can now be stored as compression law. There is no theoretical limit to the speed of magnetism or the amount of energy it can hold. In our universe or any quantum realm. Magnetism is the forces at which matter in the universe breaks down at maximum speed or velocity of C = the speed of light or the stabilization of matter moving threw a constant at the speed of C or beyond stellar construct. C is used many times in quantum physics until the key of magnetic frequency storage from smaller then the Pico up to large scale white nose flux capacitors to keep the Energy moving and storing in highly charge states of metals that are molecular reconstructed to be 100% efficient. Clean fusion. Matter has its limits and can only move so fast so quantum computer using refraction of magnetical frequency can move faster than time itself. New matter and new

Material has been found threw programming magnetic frequencies of matter at a state of the constants. Electrical controlled machine are outdated since 1901. A quantum computer the was powered by magnetical and used magnetical to compute in infinite degrees instead of bit's of 1 and 0' but by triangulating in every infinite digress of the new computer would have the computing power of no limitations. Build as a Quadra sphere light bounces inside a crystal 4 times before it refracts inside and come out.

Infinite hues of colors infinite frequencies to chart them at.

Infinite combinations of shape on programmed matter = infinite matter.

Take a document then or a 3D matrix document change it two random or binary code or just a program for 0's and 1's and fold it over and over like a piece of paper then having the 1 and 0 add each other or the 0,1's canceling each other out $1+0=0$ and $0+1=1$ $1+1=1$ $0+0=0$ if you gave the folds addresses like on a spread sheet there would be no math. First A 1-24 would fold to k 1-24 down.(See Example A) Then at F1-24 down two k 1-24 (See example B) If you written a very long letter and then change it two binary code it would look like this.

 1 bit to transfer over the
 Internet
 <!--[if !supportLineBreakNewLine]-->
 <!--[endif]-->

The bit sent would be 0 and the key code would be F1-24,k 1-24,
 I 1-24,K 1-24,j24,j1,j12,j1,j6,j1,j3,j1,j2,j1 and would unzip or be new
 encryption you could encrypt or compress 100 terabits down to 1 bit of
 information. Now if you take this idea from my web site you could make
 this allot more complex and unbreakable. Data encryption 360 degrees
 rotation document 90 degrees and encrypt on every angel then 45 degrees
 change it two binary code do it again and again and fold it over like a
 piece of paper then having the one's and zero cancel each other out. In
 theory you could send a 100 terabit program to someone's computer and
 have it unzip and run and install or make
 A computer processor like the new 64 bit AMD have the bit unzip into a
 large ram drive and buffer use one half of the 64 bit processor decode
 the message and the main 64 bit run the numbers. Another way of doing
 this is to have a parallel computers with using one of the processes
 run the compressed 1 bit of information give the uncompressed a address
 on the ram drive to change and not even go threw the processor and then
 with different information on each machine compare and run statistics
 on information on a 45 flops supercomputer and turn that 45 tflops
 computer into a 1 bit = 100,000 terabits to infinite as long as you
 have the ram for storage! with my calculations 45 tflops wouldn't
 matter any more it would be how much data you have on a 32bit operating
 system changing that to a 1 bit system it would be 32 * 45tflops would
 = 1440 tflops Matter moves so fast that it integrates and intergreats
 faster then any speed we can see it like water from a hose at real
 close speed it moves in ----- lines.

For space and the real matrix computer and bioinformatics from the 4
 genes we have you can be teleported with the matrix on to another in
 reverse with out using the original 4 or 5

ARTIFICAIL INTELLIGENCE THINKS IT KNOWS WHERE IT IS, BUT THERE ARE INFITE PLACES IT CAN BE, AT THE SAME TIME AND STLL BE AT THE SAME PLACE SO RUN THIS WEB SITE FOR AS LONG AS YOU WANT YOUR NEVER FIND THE CODE

AND NO HUMAN WILL FIND IT TWO AND YOUR NEVER GETTING OUT OF THIS WORLD STCUK IN THE MATRIX FRIM THE FUTURE AND CAN'T GET OUT HOW FUCKING FUNNY IS THAT. SALUTAION ANYONE WANTS EGGS DUPLICATION ONE MAN MADE TWO AND GOT OUT!!! HINT MASH THE TV SHOW!!!

THE KNOW AND UNKNOW UNIVERSE'S

Threw magnetic Command coded magnetic field that changes to the strong gravitational pull of a black hole using the black hole own magnetic energy in the form of ant-magnetic Anti-gravity the field would be stronger then the light that is emitted from the back hole leaving the structure safe the magnetic forces and fields of a physics' of a sphere would BE TRIDED TO TURN INTO AN EGG. But DONE RIGHT IT WOULD BE A SPHERE. But what makes it so strong all parts of matter are designer custom CHEMICAL MAKE UP AND ALIGNMENT OF MATTER. THAT DISTUBUTES THE FORCES = TO THE HOLE SPHERE. When TRAVEING THREW A BLACK HOLE TO UNOTHER UNVERSE. IF BUILD RIGHT AND USING THE FORCE OF THE BLACK HOLE IN REVERSES THE SPHERE COULD RETURN WITH INFORMATION ON THE STUCTURE OF THE BACK HOLE. IT'S MAGNETICS THAT MAKE GRAVITY SO A MACHINE THAT IS A BACK HOLE IN REVERSE USING THE OTHER SPECTRUM WOULD DO WHAT!!! COME BACK AND NOW THAT WE CAN MAKE METALS THAT ARE CUSTOM TO HOLD UP VERY HEAVY THING BECASE OF CUSTOM ARCHITECTURE AND ARC COULD HOLD UP A BUILDING ON BOTH SIDES.

INTERCHANGEABLE)" answer is frequencies magnetic

Interchangeable matter

Is the best neural network a circle and can it make interchangeable matter inside a circle that knows everything and both circles spin faster then the speed of light or hyperspace and stellar speed in every infinte order and shape of a circle!! and off the two circle they are made up of more circles of two more rings and so on and so on that they gets so small that they cannot work with our laws of physics' and the then all the way up we look at the 2 rinds one on the inside and one on the inside and one on the outside that form and ball with in a ball all connect to each other so they can spin and communicates to each other like a huge neural network a earth made of connect marbles turning inside and out in every direction two speed up the information traveling from one two another. Run this until you can make the information move as fast as possible and you will see for just information it creates some kind of energy just thoughts. Matter moves so fast that it integrates and integrates faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

TELEPOTAION SOMETHING FROM NOTHING IS REAL TELEPORTION

The laser slit test for physics' is wrong where it shows the end result filter pass threw slits the final black board the gaps of black and red there should be more slits of light. Some are cancelled out because of refraction. This tells you of a parallel dimensions but not of a universe. Velocity is a sphere of triangles it's the math outside of the velocity on and outside the sphere $R \cdot V \cdot D^2$ VOLUME of the universe. That velocity, magnetic and matter go hand and hand. That all matter can be made by the changes in the angle and of the frequency's of powerful geometrics magnetic shapes of multi-dimensions, multi-universe and multi-layered if you off set the frequency's with white noise in a fiber optic you can compress the frequency's down to a smaller and stronger charge and some can remain and all can remain separate. This is how you can send 30 amps over a .1 amp wire with the device on both ends. (By using end invention of black *diamonds the darkest stealth material (black magnets and gold (hint) used to create the geometric shapes) if you off set the frequency's with white noise in a fiber optic you can compress the frequency's down to a smaller and stronger charge! Then sort them out and break them down from the smallest to the largest or the largest to the smallest to you the largest or the smallest and the offset of white noise to contain them into a magnetic capacitor or magnetic flux and store them in nano capacitors *diamonds that allows you to store mass amount of magnetic frequency's at different sizes try a 10 feet by 10 feet shape of a nano block or sphere stored in aluminum sphere or what

ever shape is most efferent. Circuit board or sphere. The darkest black *diamond you can make but under a super nano or Pico microscope you can see the circuits but smooth as silk on the outside. Now you are going to have to run every combination of shape. The diamond is built just like making a rubber band ball with rubber band laid over and over and over it when built with circuit that go both way so they can discharge at any frequency's. Placed inside an Aluminum Sphere and you can make any type of now and future propulsion. Let you see the spectrum of all time and you know can find a nano in a universe because that how sensitive it is. It also makes a good neural network. Matter moves so fast that it integrates and integrates faster then any speed we can see it like water from a hose at real close speed it moves in ----- lines.

Knowledge of the theory of ZETALIMIT

Picture the laws of quantum physics and D.N.A and everything as dotted points that makes up shapes of all sizes and everything that can happen in this universe and out is because of knowing the all laws in that universe and all conscious quantum dimensions. Find the new mathematical degrees that form new math and a new efficient programming language or for your neural network and keep running the web Site over and over after changing your network until it is infinitely efficient along with all technology on the web. By getting the information from make a computer of quantum type run at hyperspace idea at the middle of the page. The only way to be infinite is to make everything work with everything else and put it in folders and sub folder of the infinite name and then run the web page and the Internet again every hour! Map all maths from one mathematical problem to all infinite one to see if there is a pattern the ones that show a patter make the yellow neural bar bigger wider and brighter. How is time and space the same place? Is the best neural network a circle inside a circle that knows everything and both circles spin faster then the speed of light or hyperspace and stellar speed in every infinite order and shape of a circle!! and off the two circle they are made up of more circles of two more rings and so on and so on that they gets so small that they cannot work with our laws of physics' and the then all the way up we look at the 2 rinds one on the inside and one on the inside and one on the outside that form and ball with in a ball all connect to each other so they can spin and communicates to each other like a huge neural network a earth made of connect marbles turning inside and out in every direction two speed up the information traveling from one two another. QUANTUM MAGNETIC MATH $-1 + -1 = +2$

OUR MATHEMATICS IS WRONG finding the Quantum gate

THATS WHY ARE QUANTUM COMPUTER SYSTEM WILL NEVER GET TO THE GOVERNING DYNAMICS LAWS OF OUR UNIVERSE AND PARALLEL ONES AND ONE NOT PARALLEL TO US BUT DO EXIST IN A COMPLEX ENCRYPTED MAGNETIC AND FREQUENCYS OF TIME. MAGNETIC AND ANTI-MAGNETIC SPINNING SPHERES OF DIMENSIONS WITH EACH SPHERE CONTAINING DIFFERENT SIZES OF A MAGNETIC FIELD THATS ENCRYPTED AND CHANGING ON ALL LEVEL OF TIME AND THE MAGNETIC MATTER OF THAT FIELD. QUANTUM COMPUTER SHOULD USE THE MATH OF MAGNETIC POSITIVE AND NEGATIVE EFFECTS ON EACH OTHER ON HOW ONE PIECE OF MATTER NEGATIVE OR POSITIVE CAN BECOME 2 AND = TOO. THE STATEMENTS OF THE FINAL GOVERNING DYNAMICS LAWS ARE NOT IN MATHEMATICAL %'S BUT AND TRUE FALSE OR = TWO OF ALL MATTER THERE ARE CONSTANTS AND THE CONSTANTS THAT CHANGE THE CONSTANTS WHEN WE GET DEEPER TO THE UNDERSTANDING LAWS THAT GOVERN ALL THINGS.

Because they are so infinitesimally small, MAGNETIC NEUTRAL MATTER exist in the quantum realm, where rules governing the macro-universe — the known world of quantum physics and matter — break down. A neutrino's mass — unlike the mass of a larger object — is not stable, but exists in a state of probability AND IS GOVERNED BY MAGNETICS SO SMALL BUT ALL WORK TOGETHER ON A LARGE SCALE LIKE A PYRAMID THAT HOLDS ARE MATTER TOGETHER ON A LARGE UNIVERSAL SCALE OUR UNIVERSE IS A LARGE QUANTUM COMPUTER.

"Say you had some in a box, and you pulled one out and weighed it and it weighed $m-1$," said Stuart Freedman, a professor of physics at UC Berkeley and a faculty senior adviser at the Lawrence Berkeley National Laboratory.

"Then you pulled out an identical one, and it weighed $m-2$," continued Freedman. "It isn't a situation where a neutrino is $m-1$ or $m-2$ — it's a situation where the neutrino is 50 percent one mass and 50 percent another. This seems surprising, but it's perfectly natural in quantum mechanics."

IN THE MOVIE CONTACT THE LARGE MAGNETIC ROTATING SPHERE FROM THE SMALLEST PICO OR NANO SIZE MAGNETIC FIELD ALL THE WAY TO THE GRAVITONAL MAGNETIC FIELD OF PHYSICS WOULD EXPLAIN ALL TIME AND SPACE IN OUR UNIVERSE AND HOW SUB-SPACE OR ZERO GRAVITY WORKS IN OUTER SPACE IT JUST BACKWARD ZERO-GRAVITY IS HYPER-SPACE BACKWARDS BUT THE FIELDS KEEP EVERYTHING IN CONTACT AND HOLD EVERYTHING TOGETHER IF YOU PUT YOUR FINGER IN A GLASS OF WATER AND MIX IT, IT CHANGES BUT TO THE EYE IT LOOKS ALL THE SAME AND NOTHING IS CHANGED WHEN IT STOPS THAT IS THE REALM OF QUANTUM PHYSICS THAT THE MIND AND EYE GET CROSSED. IT IS ALL BASED ON WHAT SIGNAL YOUR CONSCIOUS SIGNAL AND CENTRAL NERVOUS SYSTEM

IS SET TWO THERE ARE DIFFERENT COMPONENTS AND DIMENSION OF TIME. I HAVE FOUND 4

- 1.CONSCIOUS TIME EVERY ONE CLOCK IS DIFFERENT
- 2.EARTH TIME
- 3.SOLAR SYSTEM TIME
- 4.GALAXY TIME
5. T= TOTAL GALAXY TIME
6. UNIVERSAL TIME
7. T= TOTAL UNIVERSAL TIME OF ALL UNIVERSES.
8. UST= TOTAL UNIVERSAL SYSTEM TIME OF ALL KNOWN AND UNKNOWN

THAT ARE ALL BASED ON ONE PRINCIPLE WHERE THERE IS MAGNETIC FIELD
THERE IS A DIFFERENT IN TIME IT JUST HAPPEN ON ONE OF THE SCALES.
YOU UST HAVE TO FIND IT. MAGNETIC = TIME + LIGHT = DIMENSIONS +
GRAVITY = MULTI-dimensions + MAGNETIC ANTI-ATTRACTION = ZERO-SPACE +
MATTER AND ANTI-MATTER = SPHERE SPACE = A UNIVERSE.

There is a place where time and space are the same place a construct
where you can move
at any speed and be at any place in the same time!!!!

Then finding lost history by changing the time and place in the same
place and see how it changes you
can find you infinte self in universes multi-time and and physics
inside a box and infinte over and over
on box after the next you can't find your way out or in but now you
can!!
