You know, a moment of speculation would tell you that the United States may have landed on the Moon in flying saucers. The film of the LM was probably faked to cover it up. There is always the 'possibility' that the movie Forbidden Planet' may have been the true level of American technology in the late 50's.

Just when you think there is a limit to the imbecility to which posters can descend...

Believe  
you me, those black projects the USAF has are really something  
else!

<chuckle>

A spiritualist who claims to be channeling Alexander Abian is more  
believable than you!

Jim Davis

The black gets blacker. Ever heard of the two-stage-to-orbit Blackstar Program? Probably not. In fact, it seems one only finds out about this thing AFTER THE FACT. In fact, I wouldn't doubt for a moment that there is a USSC (United States Space Command):

"As I understand it, THE US SPACE COMMAND is under MOSTLY Navy authority, with their central base underneath KING'S PEAK, UTAH about 100m outside of KING'S PEAK, Salt Lake in a national forest. They command a fleet of craft that run missions from advanced
