Translates to

Ryanair Space Flights?

I was in a hotel in Geneva last week, and Ryanair's commercial team were heading into a conference room which was being held for a company called t/space. I've just looked them up on the internet

<http://www.transformspace.com/> and these guys are actually the "transformational space corporation," specialising in space travel.

Are Ryanair attempting to do a Virgin Galactic and start space flights? Does anyone have any info?

.
