The USAF FAST program, is moving towards a mate with NASA's COTOS! This is the same stuff that happened with the Space Shuttle Development program. NASA ran out of cash, (So the contractors started cross-breeding with like programs in the Air Force). Andrews is gonna come out smelling like a rose. This explains why Space X is getting all the press in COTOS, (Andrews, NASA, & the USAF, are fixing to pull a big bait, and switch, (and We get another Shuttle, (Something for everyone, (That leaves no-one happy)). Well It can't be worse than the compromises being made to make ARES-1 work, (LOL)!

Carl
