Yeah, but most tandem aircraft have both wing spars and a horizontal stabilizer spar to make a more rigid "box" configuration, at least to my mind.

Oh, I forgot clean about this thing, that not only flew, but got used operationally:

[http://www.unrealaircraft.com/hybrid/pages/H111z\\_sch.php](http://www.unrealaircraft.com/hybrid/pages/H111z_sch.php)

Here's one on the ground: [http://www.unrealaircraft.com/hybrid/pages/H111z\\_1.php](http://www.unrealaircraft.com/hybrid/pages/H111z_1.php)

Surprisingly, it was supposed to fly with no real problems despite its odd-looking design.

You can even get a model of it: [http://kits.kitreview.com/images/italeri1119reviewbg\\_box.jpg](http://kits.kitreview.com/images/italeri1119reviewbg_box.jpg)
