Since when has the media had any more clue than you?

>Why has NASA indicated it would start soon to review contracts so that

Because you do need a date to plan around in terms of fiscal years  
etc.

>Why not state that "shuttle will be mothballed once the 28 missions are  
>complete". ?

Because it's not certain that 28 is the proper number. It could be 27  
or it could be 29.
