Cool, you're ignorance is your downfall, for there is no emotion, just logic in my words. As pointing out how you could not belligerently voice your hate, without the hard work of those same people you talk about, is pointing out to you how hypocritical your postings are. Unplugging an amplifier so the guitarist can't play does not stop bad music, as taping your mouth shut, or disconnecting your computer will not impede your cancerous beliefs from spreading. But once again showing you, your own ignorance and hypocritical actions, is like giving you a mirror for you to see your inside ugliness, and maybe you'll hate your self less, and thus hate other people less.

So, how many "Black Females" got us on the moon during Apollo? Yes you have many very intelligent people of all races on this Earth.

However, social engineering supersedes safety in the Federal "Guvment" so your point while emotional is not factual. The United States Federal Guvnment does not hire or promote based on merit or abilities

It uses quotas and feel good politics to kiss the black ass. That is the REAL treason our Government and NASA is in a mess. Kissing the Black ass

MANAGERS doomed the Challenger
Incompetent BLACK FEMALE MANAGERS doomed Columbia

Our Federal "Guvment" and NASA needs a numbered job bid system rather than social engineering quotas that produces a substandard workforce.

Political Correctness is Tyranny with Manners

Re: "Managers" cleared the shuttle???

Spouting the concepts that any body is better or smarter than anybody else based on skin color or sex only demonstrates your ignorant perspective of the human race and the universe as a whole, as billions of people of both sexes and many different colors have discovered and invented the devices your using to spread you trash. Your white supremacist rantings need to be confronted directly and challenged for their illogic and belligerence, and so without being hypocritical why don't you use only white male discovered, manufactured and maintained ways of spreading your de-evolved thinking. Otherwise acknowledge the contributions of billions of people throughout history that have done, and are doing more for the human and many other species on this planet than your de-evolved being.

Space shuttle set for July 1 lift-off

Nasa managers cleared the shuttle for lift-off even though the agency's top safety officer and its lead engineer objected, officials said on Saturday.

"Managers" cleared the shuttle???

Engineers and Safety people did not???

Uh, wasn't this the same stupid SHIT that brought down the Challenger in 1986???

We have lost 2 out of 5 shuttles

One more and America's manned space program is done

I wonder if those Guvment "Managers" were politically correct but incompetent Black Females like the one who said no to the Columbia picture in orbit that may have spotted the wing damage??
