Well we have Griffin openly admitting.....

"You're not gonna like this, and I'm sure I'm not going to like how it sounds in print, but we are playing the odds," NASA Administrator Mike Griffin said. "

from florida today.....

with griffin playing the odds oys very possible we will have another disaster.

at that point Griffin can watch as manned space gets gutted from the agency he was supposed to care for.

Griffin is the first admin to over rule the experts and say

launch anyway lets play the odds.....

.
