Maybe it looks now that R is too good, but maybe you will find some usefull other tools, take a look at:

"The decision to use R" by Marc Schwartz
http://cran.r-project.org/doc/Rnews/Rnews_2004-1.pdf

Besides its free, it dont use your computer resources (no registry entries, ...), except from about 25MB harddisk space, when you don't use it.

Best regards

Bart
