

How to do nonparametric forecasting?

Source: <http://sci.tech-archive.net/Archive/sci.stat.math/2006-02/msg00183.html>

I'm experimenting with nonparametric regression using Nadaraya-Watson algorithm. I would be interested in nonparametric forecasting but I don't have a clue how I should proceed. I'm able to get the regression data out from the algorithm for my time-series but how can I predict the next step for the time-series?
